Robinson Cut-off Saw Gauge

Best and Cheapest on the Market

Adjustable and automatic stops.

Entirely NEW principle—not copied after any other gauge.

Sent on 30 Days' Trial

Parties ordering please state length and number of stops wanted, and whether to use on right or left of saw.

Patented in U. S. Protected in Canada.

Hardwood Rail, making continuous straight edge, doubly marked in feet and inches from saw with rule maker's dies. Handy to use for cutting odd lengths for which

it is not worth while to change the stops.

Round Steel Rod, threaded, so stops cannot be jarred along, but easily changed when so desired.

At one point in the turn stops can be lifted off rod and dropped on again quickly at the desired distance from the saw.

LOW PRICE
