Advance Power Inc., a privately owned Canadian company, has over 20 years of expertise in the design and manufacture of generators and generator sets to MIL specifications. Generator products available range in power output from 1.5 kW through 200 kW in 60 Hz, 400 Hz or DC configurations. Tachometer generators and starter generators are also produced by Advance Power for civil and military aircraft.

The company has designed ground power units for aircraft service, to the requirements of both Canadian and foreign defence agencies. The company's long-established relationships with the armed forces of Canada and the United States have resulted in proven products for both military and civilian purposes.

Ground power unit 28 V DC
1 500 AMPS gasoline engine.

Tachometer generators.

1.5 kW gas generator 60 Hz
120/240 V.

10 kW diesel generator 1 800 RPM.
