

14.8 During any phase of a dispute settlement procedure including the earliest phase, competent bodies and experts in matters under consideration may be consulted and invited to attend the meetings of the Committee; appropriate information and assistance may be requested from such bodies and experts.

Technical issues

14.9 If no mutually satisfactory solution has been reached under the procedures of Article 14, paragraph 4 within three months of the request for the Committee investigation, upon the request of any Party to the dispute who considers the issues to relate to questions of a technical nature the Committee shall establish a technical expert group and direct it to:

examine the matter;

consult with the Parties to the dispute and give full opportunity for them to develop a mutually satisfactory solution;

make a statement concerning the facts of the matter; and

make such findings as will assist the Committee in making recommendations or giving rulings on the matter, including *inter alia*, and if appropriate, findings concerning the detailed scientific judgments involved, whether the measure was necessary for the protection of human, animal or plant life or health, and whether a legitimate scientific judgment is involved.

14.10 Technical expert groups shall be governed by the procedures of Annex 2.

14.11 The time required by the technical expert group considering questions of a technical nature will vary with the particular case. The technical expert group should aim to deliver its findings to the Committee within six months from the date the technical issue was referred to it, unless extended by mutual agreement between the Parties to the dispute.

14.12 Reports should set out the rationale behind any findings that they make.
