IN THE MINING MARKETS

Percupine Stocks Develop More Buoyant Trend, and Some Advances Are Scored-Pearl Lake and Dome Extension Lead the

World Office, Thursday Evening, May 30. more cheerful undertone was apparent in the mining market to-day trading which had characterized their action previously. Such strong spots as Pearl Lake, which reached 19; Dome Extension, which scored a sharp advance to 36½; and some of the other generally prominent issues which came in for more or less activity, stamped the list as in a more responsible frame of mind, and thereby brightened sentiment on "the street" to a considerable extent. The recent lack of energy and consequent disposition to sag shown by prices has to a great extent cleaned up the floating supply of stocks in the market, and has thereby left room for considerable improvement in prices. rading which had characterized their

The upturn in Pearl Lake, which closed at 19 bid, or a full 2 points up from last night, did not come as any surprise to the street. The reopening of the mine and the fact that the company had been provided with development funds sufficient to carry on operations for a long time to see the fact.

ANOTHER MINE?

The party spent the afternoon making an inspection of the mine, and will return to Montreal this afternoon. The purpose of their visit was not given out. The rumors that have existed for some time, that the La Rose directorate proposed investing some of the financial surplus of the company in the purchase of the Chambers-Ferland, might be verified on this occasion.

TRETHEWEY MINE

COBALT, May 30.-The Trethewey mine has commenced work on its shaft No. 6, which is to be sunk to a depth having never been opened up.

progressing on the Highland Inn at Cache Lake, Algonquin National Park, are nearing completion, and will be en-tirely finished by June 30. These imprevements include an extension to this popular hotel of 50 bedrooms, five adlitional bathrooms, tearoom, musicroom, commodious store for the outfitting business, billiard room, etc. The hotel will be able to comfortably from the number of enquiries that are already several claims there on which being received up to the present, it is promising discoveries have been made gratifying to note that the park will in the early development work. be as popular as ever with the great army of summer visitors this year.

Extensive Plans for Working Southern Portion of Property - Much Virgin Ground

Yet Unprospected. COBALT, May 30.-An extensive plan of development work is being under-taken by the Coniagas whereby the

southern portion of their property be thoroly explored. Practically one-half of the Coniagas ground is still vir-gin territory, the deepest portion of the conglomerate im which it is getting its sliver having yet to be opened up. Like the other mines on the west ridge, the Conlagas possesses a bed of conglomerate running from a few feet in depth at the northwest portion of the property near Sasaginaga Lake to a very considerable depth at the south boundary

the property.

To ascertain what values exist the conglomerate on the southern half of the property a cross-cut is being driven from the present workings at the third level (225 feet) towards the southern boundary. This cross-cut wil terminate somewhere near the corner of the Hunter block and from here a drift will be made to the old shaft that exists on the corner of Prospect-avenue

and Silver-street.

This old shaft was put down s years ago to a depth of 60 feet and then abandoned. A raise will be made to from the 255-foot level as it will necessary for the ventilation of the workings, The removal of the waste rock will be effected from the short for a resident waste rock will be effected from the short for a resident waste rock will be effected from the short for a resident waste rock will be effected from the short for a resident waste rock will be effected from the short for a resident will be effected from the short for a resident will be effected from the short for a resident will be effected from the short for a resident will be effected from the short for a resident will be resident to the short for a resident will be resident to the short for a resident will be made to from the short for a resident will be resident. shaft for a portion of the workings, will be a considerable time yet before the exploratory cross-cut reaches far, but the work that has already done has encountered several small veins and there is every prospect of the Conlagas opening up another por-tion of their property that will be as productive as the half already worked.

CHINA'S FORMIDABLE ARMY.

NEW YORK, May 30 .- A stateme NEW YORK, May 30.—A statement from Yuan Shi Kal, just received here from Pekin, outlines the Chinese lead-er's plans for building up an army which will be the equal of that of us-many. His plan is based on university many. His plan is based on univ
