Poultry and Pet Stock Fruit, Flowers, Vegetables

GEESE ARE GOOD **AND PRICES HIGH**

Keep Grass Short on Lawns and in Public Parks.

ARE QUICK GROWERS

Can Be Marketed in From Ten to Fourteen Months.

Sheep have been used for keeping me grass short on lawns of private tes and public parks. When the yns are not too large a flock of will accomplish the same result, and they are far more robust, requirng less care and attention than sheep. sufficient room they will graze themselves until cold weather. and then almost any kind of a shed will afford sufficient protection. Even ne goslings require only protection on the sun. A shady spot is all they A stream or pond is not re-A large tub to bathe in in the birds can be kept clean is

the water necessary. he profitably utilized for grazing of for geese, glving them access to and day land for roosting. Emden geese are tall, erect birds, th fine square bodies. The adult see weigh eighteen pounds each and ders twenty pounds on an average. The plumage is pure white; the bill is flesh color and the legs are The egg is large, with a thick shell Geese seldom lay until ter they are a year old. The period bation is thirty days. Buff or Plymouth Rocks are used for mothers, Turkeys

make good mothers. Geese are quick growers and can be marketed in ten to fourteen weeks. The price of dressed poultry and feathstantly increasing. nature geese are grazing birds should be allowed to roam, as the ter part of their feed must be n stuff. They have no crops, and old weather should be fed on ind corn in the form of a slightly mash, alternated with a mash corn meal, wheat, bran and ground

Get After Potato Bugs Early

The potato bugs should be poisoned before they get too much of a start. Paris green used at the rate one-half pound to 50 gallons of water is very satisfactory. If a pound or two of lime is added it will prevent any leaf burning that might otherwise occur. Arsenate of lead is a good poison and sticks on the leaves a long time. It does not burn the leaves. Of the dry use 1½ pounds to 50 gallons of water and of the paste a pounds.

The potato bugs should be poisoned from April to September. Helenium pumilum magnificum grows about 18 inches high, covered with golden yellow blossoms all summer. Helianthemuns are pretty, low growing evergreen plants, forming broad clumps, quite covered with bloom from July to September. They are not only good plants for rockeries, but also for dry, sunny banks

With the cucumber it is often advisable where the plants are too thick to remove some of the lateral shoots or termove the tip. If the plants tends to produce an overabundance of leaf growth it may be pinched back in the plants of the colors of the flowers are often to encourage the growth of fruit. The melon plant may be privated in the lateral shoots or clearly with small pink flowers, flowering in June and July. Geums make good plants for rockeries; the colors of the flowers are of the melon plant may be privated in the lateral shoots or clearly with small pink flowers, flowering in June and July. melon plant may be pruned in the May to July.

way as the cucumber.

SKIN TROUBLES sunny exposures ing all summer. Silene schafta

Blood Which Must Be Enriched and Purified.

So many people, both men and wom-

m, suffer from skin troubles, such as eczema, blotches, pimples and irri-tations, that a word of advice is necesiry. It is a great mistake for those ing from troubles of this kind to mear themselves with greasy oint-ments. Often they could not do anyion becomes actually worse. When there are pimples or erupons, or an irritating or itching rash, soothing boracic solution may help mended. allay the irritation, but of course that does not cure the trouble. Skin complaints come from an impure conthe blood is thoroughly purified. it is well known that Dr. Williams' and this new blood attacks the impuridisperses them. Dr. Williams' Pink tivation later cuts off corn roots and kills but few more weeds and makes was growing worse, I consulted

decided to do so. After using two

TISE TEM ATT. Don't waste any of your vege-ables. Use what you can and can what you can't. You may think this superflu-ous advice after you have toiled a grow them, but it is a fact that thru carelessness quanti-ties of vegetables are wasted

way or the other when their quality is 100 per cent. Remember that it is easy to let them to too far and then to find that they are on the turn and you can do nothing more with them. There is such a thing as catching them just at the right moment. One of the greatest as-sets of a garden lies in having vegetables of such a quality that /ou cannot buy anything in the stores to equal them either canned or fresh.

Then again, few people take advantage of the young vege-tables which they are thinning out about this time. For instance, the young beets taken up now are better for pickling than any of the later growth. Another thing that Canadians do not realize is that the tops of vegetables should never be thrown away. French women use them all in their soup stock. Canadian women throw them in the garbage can. Try saving them, and keep the water you soil your vegetables in for the stock pot, too. This is another tip from the thrifty Frenchwoman. The tops of beets, especially the young plants you pull to thin out the rows, make as delicious "greens" when boil-

ROCK PLANTS

W. Ritchie, Parkbeg, Sask., says: "Two years ago I was attacked with eczema on my hands. I tried almost everything that was advised, but as the trouble was growing worse. I consulted the same of the do not pay for the additional labor. Alternate plots of corn were given three extra cultivations about the days apart after five ordinary cultured to the same of the s a doctor and took his treatment for tivations had ceased. The average

I decided to do so. After using two boxes I could see an improvement, and I got a further supply. I used altosether eight boxes, by which time every trace of the eczema had disappeared and there has been not a single symptom of the trouble since that time, I gladly recommend Dr. Williams' Pink Pills for troubles of this kind."

It should be added that Dr. Williams' Pink Pills have a beneficial effect upon the general health. They increase the appetite and energy and cure all diseases that arise from impure blood. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

Bordeaux-arsenate of lead is practically the same as pyrox, and may be used for controlling potato bugs and flea beetle. Nicotine sulphate added will keep aphis, or plant lice, under control. This spray may be used to advantage on tomato plants, hollyhocks and other plants troubled with insects and disease.

On vegetables or fruits such as tomatoes do not use a poison spray when the fruit is ripe. Arsenate of lead is poison and must be used with caution. If the tomatoe plants set out early are progressing well, obtain a few small plants and set out late in June. These will furnish some ripe tomatoes and street out late in June. HOW TO SECURE GOOD LEGHORNS

Chicks Must Be Given as Wide Range as Pos-

THEY ARE LIGHT BIRDS

But Will Make Broilers as Quickly as Larger Breeds.

Average Leghorn hens weigh only about three pounds alive. Many of them will dress only two to 21/2 pounds. This is not a desirable size for a table fowl, being too much under the weights (four to five pounds) which most people prefer when buy-

average Leghorn hen produces chicks so small that they do not remain very soft meated until they have reached the size the market demands in broil-ers, and so the cockerels cannot be sold for poultry at that stage with the same profit as cockerels from

The standard weights for mature Leghorns are: Males, 5½ pounds: females, four pounds. By making these the minimum weights for birds used

Even when good-sized Leghorns are Manser Webb had extra choice quality not make good poultry unless they are well grown. In a measure this is true of any chickens; those that are poorly grown never make the deve-

But, the Leghorn breed being at the lower limit of size for good table poultry, and the cockerels having a tendency to become hard meated at an early age, good growth is absolutely essential if passably good table quality is to be secured. To secure good growth, Leghorn

Garden crops will not give good results inless the soil is kept well cultivated. unless the soil is kept well cultivated.
Cultivation is not intended primarily to kill weeds, altho this is important, but to loosen the surface and let air into the soil so as to provide a more congenial environment for the roots of the plants. Plants in soil which is too wet turn yellow, and if not relieved by proper cultivation and drainage languish and die. Too much water in the soil dilutes the soil solution, impedes the formation of nitrate, destroys desirable soil organof nitrate, destroys desirable soil organ

to dry and bake, offers an environment as uncongenial for plants as when too wet. Either extreme, therefore, should be guarded against.

If the soil is naturally wet, provide surface or tile drains. If inclined to bake

WHOLESALE FRUITS AND VEGETABLES

Fruit Market Opening.—The fruit market will beopened for the season on Monday next, the 24th inst., one day earlier than last season. day next, the 24th inst., one day earlier than last season.

California Fruits—The first straight car of mixed California fruits for this season arrived on the market yesterday to McWilliam & Everist, just two days later than the first car last season; apricots and plums selling at \$4 to \$4.25 per case and cherries at \$4 per case.

Cantaloupes—Cantaloupes are beginning to come in freely. They are of excellent quality and slightly easier in price, standards selling at \$7 per case; ponies at \$6.50 per case and flats at \$3 per case.

Strawberries—Strawberries kept practically stationary in price, selling at 25c to 32c per box, only a small number of the really choice bringing the 32c; the bulk selling at 28c to 30c.

Beets—Shipments were especially heavy yesterday, the price declining materially, ranging from 30c to 50c per dozen bunches.

ing a fowl.

Besides being small herself, the

lopment or have the table quality of those that are well grown. chicks must not be overcrowded in brooders or coops, and as soon as

they are large enough to range over an extended piece of ground should be given as wide range as possible and at the same time fed liberally. Chicks so treated will grow twice as fast as those that are reared under the intensive conditions to which the greater number of Leghorn chicks are subjected. They not only grow faster, but continue growing several weeks longer, and make very much larger oirds at maturity.

isms and permits the development of un-desirable ones.

Soil which has been too wet, if allowed

after rains, cultivate as soon as it is dry enough. As a rule, stirring the surface two inches will give better results than deep cultivation.

If the garden is located near the kitchen door the hoe and rake can be kept conveniently near so that odd moments can be spent in cultivating.

Potatoes planted in June keep well and make good seed for the following spring.

ranging from 30c to 50c per dozen bunches. McWilliam & Everist had a car of California cantaloupes; standards selling at \$7; ponies at \$6.50 and flats at \$3 per case; a car of cabbage, selling at \$5 to \$5.50 per case; strawberries at 25c to 32c per box; asparagus at \$1,50 to \$2 per 11-quart basket; green peas at 50c to 50c per dozen bunchee. A. A. McKinnon had a car of Ontario potatoes, selling at \$1.90 per bag; a car of No. 2 Red Stars at \$6.50 per bbl.; a car of cucumbers at \$4.50 per hamper; cabbage selling at \$5 per crate. D. Spence had cabbage, selling at \$5 per crate; strawberries at 25c to 30c per box; asparagus at \$2.25 to \$2.50 per 11-quart basket; choice beans at \$4 per hamper; cucumbers at \$4.50 per hamper. H. Peters had a car of mived vege. The standard weights for mature Leghorns are. Males, 5½ pounds; females, 5 vour pounds. By making these the minimum weights for birds used in breeding, and by giving the preference to the largest specimens that show Leghorn type without coarseness, strains of Leghorns may be developed that with no leas of laying capacity have considerable merit as table fowls in a limited range of uses. Leghorn hens which alive weigh four pounds or more are heavy enough to meet the demand for dressed fowls a little under the weights generally preferred, and there is enough demand for fowls at this weight to take all the supply. The cockerels bred from hens of four pounds weight and over, if properly grown, will make broiler size as quickly as the chicks of most of the larger breeds. They will also be soft meated up to about two or 2½ pounds weight. After that they are apt to harden quickly and their flesh is not so tender. Leghorn cockerels produced from very large males and females—that is, from males that weigh upward of 5½ pounds make satisfactory small roasters for home use, tho they will not sell as well on the market as birds of the same weight of a slower growing breed. box; asparagus at \$2.50 per latguart basket; choice beans at \$4 per hamper; are at \$4.50 per hamper; a car of mater and the tasket; choice beans at \$4 per hamper; a car of mater as table fowls in \$4.50 per six-quart basket; the sale of \$1.50 per six-quart basket; green peppers at \$1.25 per case; at \$7 per case; at car of cantaloupes, standards, belling at \$2.50 per latguart basket; choice beans at \$4 per hamper; at a \$7 per case; at \$7 per hamper; at \$7 per per data \$7 per hamper; at \$7 per hamper; at \$7 per hamper; at \$7 per hamper; and per hamper; at \$7 per hamper; arrots at \$7 per box; asparagus at \$2.50 per furdare apper hamper; are of mice per hamper; are of market \$7 per hamper; acrots at \$7 per hamper; are of market \$7 per hamp wax beams, selling at \$4 per hamper. California lemons at \$11 per case; hothouse cucumbers at \$2 per 11-quart basket; tomatoes at \$1.90 to \$2 per 4-basket carrier; strawberries at 25c to 30c per box The Longo Fruit Co. had a car The Longo Fruit Co. had a car of Georgia peaches, selling at \$3,50 per 6-basket carrier; California plums at \$4 to \$4.50 per case; apricots at \$4 per case; hothouse tomatoes selling at 25c per lb. Stronach & Sons had a car of cucumbers, selling at \$4.50 to \$5 per hamper; a car of tomatoes, selling at \$2 to \$2.25 per four-basket carrier; a car of Red Star potatoes, selling at \$6.50 to \$7 per bbl.; cherries at \$1.25 to \$1.50 per sixquart flat basket; a heavy shipment of beets at 50c per dozen bunches; asparagus at \$2.25 to \$2.50 per 11-quart basket, and heavy shipments of strawberries at 28c to 30c per box. Chas. S. Simpson had a car of cantaloupes, selling at \$7 per case for standards and \$3 per case for flats; a car of Georgia peaches, selling at \$4.75 per six-basket crate; beans at \$3,50 per hamper; a car of cabbage at \$4.75 to \$5 per crate.

crate.

Dawson-Elliott had strawberries, selling at 26c to 30c per box; green peas at \$1.35 to \$1.50 per 11-quart basket; asparagus at \$2 to \$2.50 per 11-quart basket; cauliflower at \$1 per 11-quart basket, and \$1,50 per 16-quart basket; gooseberries at 65c per six-quart basket; Red Star potatoes at \$6.50 per bbl.
