Left Prostrate

Weak and Run Down, With Heart and Kidneys in Bad Condition -

Restored by Hood's Sarsaparilla. "I was very much run down, having been sick for several months. I had been trying different remedies which did me no good. I would have severe spells of coughing that would leave me prostrate. I was told that my lungs were affected, and my heart and kidneys were in a bad condition. In fact, it seemed as though every organ was out of order. I felt that something must be done and my brother advised me to try Hood's Sarsaparilla. I procured a bottle and began taking it. Before it was half gone I felt that it was helping me. I continued its use and it has made me a new woman. I cannot praise it too highly." MRS. SUMMER-VILLE, 217 Ossington Avenue, Toronto, Get only Hood's, because

[Reported by A. M. Hamilton & Son.] London, Wednesday, Jan. 5. Wheat, white fall, per bu....83c to 84c Wheat, read, fall, per bu.....83c to 84c Wheat, spring, per bu83c to 84c lean cattle bring rather better prices Wheat, spring, per bu....811/2c to 82%c Oats, per bu.. 251/2c to 253/4c Barley, per bu......29c to 31c Rye, per bu......33½c to 36½c Buckwheat, per bu34c to 36c cows, weighing 10,960 lbs, were sold at

Grain receipts were on the light side this week. The holiday and election day coming in almost together was the chief cause given for the falling off. Very few changes are to be seen in the value of anything since last week.

The oat market was most affected by the light deliveries, 75c to 77c being

Peas, 75c to 80c; barley, 60c; corn, 60c to 65c; good beans, 50c to 55c, and poor ones at 30c to 40c. Only one lot of buckwheat offered, and the price paid was 75c. No rye came in. Eggs were steady at 20c by the bas-

ket when perfectly fresh; 13c to 14c Butter sold at 15c to 17c by the basket for pound rolls; 13c to 14c for large rolls and crocks.

Chickens, turkeys and geese show no The meat market was quiet. ceipts were only moderate, even the supply of dressed hogs was light with prices about the same

Quite a few vegetables came in on Thursday, Friday and Tuosday, but prices were much the same. Hay was steady at \$6 to \$7, the sup-

sheep, \$2 50 to \$3 75. MONTREAL, Jan. 3.—There has been the foreign markets being at about as ket this morning the offerings of live stock were 200 cattle, including 150 mand today was very limited, there being only a few buyers present; maring was steady, and values show no material change; a few choice beeves 214c to 234c per 1b, live weight. The receipts of sheep and lambs were small, there being only 80 head on the 34c to 34e, and lambs at 3%e to 44e per lb, live weight. A few common calves brought \$2 50 to \$5 each, as to size. At the Point St. Charles stock yards trade was exceedingly slow; the receipts of cattle were very small, and there were no sheep, lambs or live hogs

OLD COUNTRY PRICES. London, Jan. 4.—There was a weaker feeling in the market for States cattle, and prices declined 4c, choice selling at 11c; choice Canadians were steady at 10c, and Argentines at 10c. Choice Canadian sheep sold at 10c, and Argen-

tines at 11c. Only he who owes no debt can be at peace with all men.

Almost Thick Enough to Cut With a Knife.

Accidents Which Occur in the Gloon of the Metropolis.

Fog is not, of course, peculiar to London, though the fog of London has attributes quite peculiar to London. Channel fogs are well known to all traveling on the continent, and between Ushant and Plymouth steamers are frequently obliged to slow down at certain seasons of the year on account of it. According to Mr. Rudyard Kipling, in the "Rhyme of the Three Sealers, NEW YORK, Jan. 4.—Butter firm; the killing grounds are reached. "Half western creamery, 15c to 23c; do, factory, 12c to 15c; Elgins, 22c; imitation sun is mostly veiled. Through fog to sun is mostly veiled. Through fog to fog, by luck and log, sail ye as Bering And in our sunniest shires, sailed. says the London Dally Telegraph, there are often days when a thick, damp, gray shroud hangs over everything. Only last week the royal buckhounds were unable to go out on account of it. But London fog comes down to us through the smoke of ten thousand chimneys, and has a power in collecting and bringing down every impurity in the air analogous to that of the isinglass used in the fining of wine. It is not difficult to understand that respirable air, with its proper proportions of oxygen and nitrogen, such as all lung-breathing animals require in a state of purity and abundance, cannot absorb quantities of carbon in the form of soot and sulphurous and sulphuric acid without becoming heavy, opaque and oppressive. London air is being constantly breathed over and over again by its millions of human beings and animals, and it is a medical truth that it would only be necessary to keep people long enough together in a close room for them to

ison one another. The tragedy of

sphere is invariably a stagnant one

the Black Hole of Calcutta is instance

and thus it may soon become fatally

contaminated with germs of all sorts

and miasmic vapors As far as hospital admissions for accidents are concerned, a typical vellow fog is only second to a hard frost and slippery street. But any long spell of fog, such as that of the close of 1891. sends the death rate from diseases of the respiratory organs up with a bound It is also highly conducive to the spread of influenza, of which there is TORONTO, Jan. 4.-There were 41 a certain amount about at the present loads on the market today, including time. To any whose lungs, windpipe 1,422 hogs, 335 sheep and lambs; butch- and mucous membrane generally are at ers, 3c to 31/2c; stockers, 21/2c to 3c; all susceptible, a fog, with its horrible bulls, 2c to 21/2c; feeders, 3c to 31/2c; burden of soot and impurities, is inexport cattle, 4c to 44c; stock bulls, 3c tensely irritating, and often causes to 31/2c. Hogs-Singers, 5c; thick, fat trying coughs. The eyes, too, suffer there seems unfortunately very little practical remedy to offer so long as coal must be burned. The general uses of smokeless anthracite would greatly mitigate our inconveniences and dangers, but that, perhaps, is more than we dare expect in this generation. Some benefit, too, may be hoped for as oil becomes more widely employed for ooking or driving machinery, and so far as contaminating the air is concerned, the substitution of the electric light for gas is an immense gain. London has, of course, had its "great fogs," even as it has had its "great fires." There was the memorable cattle show in the sixties, when a number of the poor fat beasts were simply suffooccasion on which Mr. Toole succeeded in reaching his theater and found that only one solitary sight-seer had done the same, the two at once sympathetically fraternizing in misfortune. One of the most curious effects of a fog is the way in which it will cause people to mistake even the most familiar roads and routes. Sometimes it is wholly unaccountable how the error has been made, as one may have imag-

ined himself going perfectly straight through a square, to find that he has crossed it and got to exactly the other Without an exceedingly good "bump of locality", and the faculty of remem bering even in the gloom and darkness a number of small but frequent landmarks, the way is certain to be lost, even though traversed daily, and the rare possessor of this useful attribute is sometimes astonished on a foggy night to observe the utterly stranded and belated appearance of whole groups of people in the localities with which, under ordinary circumstances,

The production of low-grade ore, however, unless carried out on a ket quiet and trade slow, but the feel- gigantic scale, could not practically be carried out at all. Even those engineers used to large operations assured changed hands at 41/4c; good at 31/2c to Mr. Edison that no machine could be 4c; fair at 3c to 31/4c, and common at constructed powerful enough to crush five, six and seven-ton rocks, nor could any machine withstand the terrific jar which would result. Nevertheless, Mr. market; prices steady; sheep sold at Edison invented such machinery, and so completely that not even 100 horsepower is required to reduce rocks weighing six and seven tons to dust in less than three seconds from the time they are thrown into the crushing machine. What Mr. Edison has done, says Mr. Waters, has been to subdue to his service three great natural

The big rocks are not, strictly speaking, (rushed by the direct power of an engine or dynamo; momentum alone turns them into dust. No mechanism assists in the separation of the ore from the sand; magnetism does it all. Except for the elevators which raise the ore to the cupolas of the buildings, there is in many of them no machinery:

The superstructure cannot be lasting, cannot be perfect with a bad foundation. Ten years ago this business was streed on sound principles; its growth has been sure and solid. At no time have questionable tactics been employed, wild statements made, or reckless adventure undertaken.

Journal.

Lake Shore, Bosanquet, Jan. 5 .- On Wednesday, Dec. 29, at the residence of Mrs. Barbara Rodgers, of Lake road, West Bosanquet, a happy event came sie A. Johnson, the only daughter in the "No, sir, the scenery," he thund-ered, with punctuating puffs between Campbell, of Warwick. The cere-40 or 50 in all, were mostly relatives of "Yes, sir," resumed the major, "this the two contracting parties, some of is easy walking to what I have done whom had come long distances, viz.: in my day. The hardest climb I ever Mrs. Gould, from Oak Lake, Man.; had was on one of those Swiss glac- Duncan Johnson, of Sydney, Man.; Dr. iers, I was alone, for I always prefer Dan Campbell, of Saginaw, Mich; Dr. to travel without guides. As far as John Campbell, of Brown City, Mich.; the eye could see there extended a Dr. Byron Campbell, of Zurich, Ont.; Mr. mighty bed of ice, as flat as a mirror James Campbell, of St. Thomas, who is and without a single object on it to an uncle of the bride, and Miss Jean elieve the monotony. After walking Sutherland, of Detroit, Mich. The gifts for three hours it dawned over me that were well chosen, and many of them I was making absolutely no progress, were evidently purchased by persons whole plant is a wonderful example of and thought at first I was at a loss to with well-lined pockets. One little paper present seemed to draw attention-"Happening, however, to stand still it was a \$20 bill. Dinner was served aggregation is as compact and as self- for one moment I found that the gla- about 8:30, and was gotten up in fine cier was slowly slipping from beneath style, and then a programme was brought forward. Mr. Dan Campbell, on human agency for assistance. From going through the motions of walking of Warwick, father of the bridegroom, was chosen chairman, and speeches were made by several of the talented ones present. Vocal music was furnished by the impromptu choir, and cars, it is not touched by human hands. a short while succeeded in getting, not songs and instrumental music by those of the company who were able to do it well. In the early morning hours the company broke up, and left with a feelng of satisfaction, and were quite hearty in their congratulations. School meeting went off quietly on Dec. 29 in school section No. 7, Bosanquet. Mr. Matthew Watson is the new

trustee, and Mr. John Fuller retires after filling the office for six years. On the evening of the 29th, at the The Christian Endeavor movement in Congregational Church, Lake Shore, Boall parts of the world has taken with sanquet, a very enjoyable Christmas house. Santa Claus came in running giving of money and time to God. The number to be served, could not carry first is embodied and made concrete by very heavy parcels. He showed a disthe "tenth legion," which is simply the position to treat all alike, so he must enrollment of those who will promise have found them to be all good chilto give not less than one-tenth of their dren. No fee was charged, as money income to God. This has already been was not the object, but over \$6 were rapidly winning its way. This money is readings, recitations, dialogues and to be given through the churches and music were furnished by local talent, denominational boards for the spread and the speeches were from the same source. John McGhee very ably and pleasantlty filled the chair. Mr. and Mrs. Hector McNeil gave a very nice New Year's dinner to some

> Miss Frances Shawanoo, who had been very low in consumption for the last three months, passed peacefully away on Dec. 27 at the age of twelve years. Before she died she had her friends called around her bed, and told them she was going to heaven, and ex horted them to come to Jesus, and live according to his precepts, as she wanted to see them all in the happy land. At about 4 o'clock on Monday afternoon she breathed her last, and was buried in the Shawanoo cemetery on Dec. 29, Mr. Wm. Wellington officiating in the absence of the pastor. Rev. H. D. Tyler, who preached her funeral sermon on

The Indians of Kettle Point and Stoney Point reserves turned out in holiday attire, and with huge baskets filled with the needful, and heid their annual feast at the council house on New Year's Day. The dinner was served at noon, tea at about 8, and supper a little after 11. The tables were filled with a very choice lot of well prepared beautiful cakes, tarts, and everything to satisfy the most fastidious. Severa of their white neighbors accepted in vitations, and were heartily welcomed, Moses Thomas very ably filled the chair. The brass band, under the lead-Mr. Milligan played the organ. Son derstand them. One very smart young ram Rawlings gave the only ones in either anything of much note. On the whole one thing is evident, the Indians are coming up. The doxology was sung at about 11 and all went home, except
