COBALT--- Ore Finding Machine Now in Use at Cobalt Camp --- COBALT

NANCY HELEN MINE ONE OF COBALT'S SHIPPERS

As shown in map below, this property is situated in the very best locality that could be chosen in the Cobalt Camp.

It is bounded on the south by the City of Cobalt, Townsite and Silver Queen Mines. On the north by City of Cobalt, Coniagas and Trethewey Mines. On the east by City of Cobalt Mine, and on the west by the Buffalo

Now is the Time to Buy Market is on the Rise

The Nancy Helen is one of the best equipped mines in the camp. The buildings and machinery are second to none, and IT IS NOT A PROSPECT, but a shipper, and is only capitalized for \$500,000.00.

We have confidence in this Mine as an Investment If you invest now you stand to make profit as the market rises. The mining operations are conducted on a business basis, as is shown by

the following excerpts from a report by E. C. Kingsmill, Mining Engineer:

During my 22 years' active mining operations, I must confess it has not been very often that I have found a mine conducted as this mine is. There seems to be a place for everything and everything in its place, etc.

Values of Ore, from Engineer's Report: "This north and south ledge I consider is one of the best in the camp. It varies in width, yet will average 2 feet of highly payable ore. An average carefully taken from this drive gave 2,722 ounces to the ton."

"On another drift of 58 feet, samples carefully taken from the whole distance gave 1,885 ounces silver to the ton."

"Yet another ledge carefully sampled gave 960 ounces to the ton." Another drift gave 734 ounces to the ton.

We are making a Special Offering of this stock of which we have only a limited number of shares at 60 cents per share, payable half cash, balance in 60 days. Fullest particulars on application.

Lorsch & Gamey, Brokers 36 Toronto Street.

World Office, 'Friday Evening, Oct. 2.

An active market was witnessed for Cobalt Central-100 at 41. An active market was witnessed for the Cobalt securities, particularly near the close to day. For the last few days it was recognized that prices were in the hands of inside speculators who endeavored to force a certain amount of crealizing by forcing quotations. That these tactics have not been successful was demonstrated to-day when outsfide purchases brought about a sharp retreat on the part of those who are trying to dominate quotations. Considerable public buying and actual offerings were too scarce to prevent offerings were too scarce to prevent advances. In issues in which the demands occurred prices moved up easily and at the close it was recognized that speculative pressure were recognized at 51. that speculative pressure was the only weight on prices. New York was more at 18%, 100 at strongly favorable to Cobalts to-day, and the undertone both here and on Wall-street was strongly, buoyant at
