Some 25,000 Have Been Kept Busy—Only 50 Mile Gap Will Remain Unfinished Between Edmonton and Pacific by End of Season

Montreal, Oct. 15.—In view of financial stringency, the result of war and rumors of war in Europe last spring, the report of Sir William Mackenzie, president of the C. N. R., strikes an optimistic note and does much to reassure the business men of this country.

According to the C. N. R. president, his company has spent an average of \$4,000,000 a month during the summer and built in main lines and branches up to the first of September more than 840 miles of railway.

A railway starts to construct a branch into a territory hitherto lacking the blessing of transportation and all that it entails.

In Canada, as often remarked by visitors from other lands, we have a splendid network of railway lines. It is maintained on a population less than one tenth of the republic to the south.
