

impression, as they were a decided improvement on the set of the previous year.

During the month of April a very interesting exhibition of work by members of the Section was made, and a great deal of interest was taken in the exhibit by the Association and friends.

During the past season a question box was placed on the table and proved a step in the right direction, as it was the means of making known points that otherwise would not have been brought out.

During the year several improvements have been made in the dark room and apparatus added. Gas has been introduced into the lamp and an Alladin lamp and a table purchased, which are found very convenient. The Section had an enlarging apparatus placed, and members can now do their own enlarging.

An Anthony Portrait Lens has also been introduced by the Section for use in enlarging.

All of which is respectfully submitted.

J. R. MOODIE,  
*Chairman.*

WILLIAM WHITE,  
*Sec.-Treas.*
