DOWLING BROS, 95 KING STREET, B. ST. JOHN, N. B.

THIEVES IN ALBERTON.

By telephone advices from Alberton Charlottetown Guardian learns that three parties were arrested Wednesday morning on suspicion of breaking into the Montreal bankrupt store at that place. They are Henry Mc-Dougall and George McDougall of Hills' River and Ernest Forsythe of Dock. It is thought that between \$500 and \$600 worth of ready made clothing, boots, shoes, watches, etc., was stolen. The greater part of the stolen goods was found under the Presbyterian church. Their trial took place yesterday before R. B. Reid, George R. Montgomery and George M. Clarke. George McDougall turned Queen's evidence and swore that Ernest Forsythe broke into the store and took the goods, while he watched out-They carried part of the stolen goods to the tower of Dock Presby-terian church and hid them between the flooring and plaster. Part they hid in the woods about a mile and a been secured by the constables. The rest of the stolen goods were put in McDougall's barn, at Hill River, about three miles from Alberton. Henry McDougall is about thirty years of age, George McDougall about twenty-one, and Ernest Forsythe twenty-four. Constable Burke of Tignish made the arrest. The prison-Constable Burke of ers ha e been remanded to Summer-side jail for trial at the supreme court.

CHIPS.

The oldest of the Paris market-women, named Deschamps, is dead, at the age of 94. She supplied the Tuileries with vegetables in the days of Charles X. and Napoleon III., and there was an impression for years that the emperor was in love with her.

giving the former a sound thrashing. The inhabitants of houses should not remain in the kitchen or other room where a fire is burning in the grate during a thunder storm, as the heated gases from the chimney-top vide a line of least resistance; and this is so whteher the house be provided with lightning conductors

Of 70 deaths occurring from light ning strokes in France during one year, it was found that 60 happened in the mountains of Puy-de-Dome. Away from hills individual risk is really infinitesimal, and it has been shown that such risk as there is chiefly to those out of doors.

The Rev. R. Hooppell, rector of Byers Green, Durham, who has died at Bournemouth from the effects of monia, was one of the most eminent amongst north of England antiquaries, and also took an active part in philanthropic movements in the

Alloys of aluminum with four to eight per cent. of silver are harder than pure aluminum, are not brittle and take a fine polish. The color is similar to that of fine silver. They are being used for medals, charms, etc. The desert of Sahara is becoming a garden. Within a few years 12,000,000 acres of land have been made fruitful by artesian wells. But there are 900, 000,000 acres yet to be reclaimed fore all the sand wastes of South Af-

rica are utilised. PRAISES THE TRENCH.

Principal Grant's Remarks About Their Qualities.

The Rev. Principal Grant of Kingsof people think the French-Canadians are not as good as we are. They ous sculptor, our two best painters, would ask, has Ontario given six such tier, Dorion, Masson, Angers, Joly and Laurier? I admire Angers for giving up his position when right dictated. until the sectionmen's arrival. The mass of the French-Canadians are, on the whole, a fine class of peo-

GREAT DAMAGE FROM DROUGHT. The long continued drought is very seriously affecting business on the St. Croix, says the Courier. The lumber mills have been practically idle for eight weeks past. Occasionally a mill is able to operate one gang, at a low pressure, during a day or a night, but five hundred men employed in the mills and much vessel property is idle and

crews out of work. Since last week the cotton mill has had to shut down two hundred looms, throwing over one hundred and fifty operatives out of work. Other small industries are idle or running at a small rate. Up at Baring, Granville Chase's mills are practically idle and sixty men there are waiting for more water to get work. The pres ent is not the only time that will be affected for, with logs in the booms the lumber operators will cut a very limited quantity next winter. Only forty millions were cut last season and not more than one-third of that quantity will be cut next season. Such a for forty years. Many portions of the river bed are bare that have not been exposed within the memory of the pres-

A CHAT WITH A "HOUSE-BREAKER."

ent generation.

"John Watson, House-breaker," was the ominous notice that caught the eye of a Tit-Bits man the other day when on the prowl for information. The occupation of Mr. Watson turned out, however, to be a much more peaceable character than one would have imagined, for it proved to be nothing more than the pulling down or breaking up of old houses.

"How do we work ?" said the house breaker, repeating the Tit-Bits man's question. "Well, I only work in a small way, but am perfectly ready to tackle anything from a town hall to a four-roomed cottage. I always keep my eye open for rebuilding operations, and if anything is doing at once make inquiries. Then, if the folk are willing to do business I give them an estimate,

and, may-be, get the job.

"One of the quickest things in house-breaking I have done was the pulling down of a four-storied, well-built building. I put twenty men on the in two days. Another old warehouse, which was razed to the ground in three days. Of course, it is not often we have to hurry in this way. and can generally take a little more

"There is a good deal of danger in our work. No one ever worries about the dangerous nature of a house-breakbrigade work. One of my men had a fearfully narrow escape. He was engaged in breaking up the roof of a mshackle building in the city, near the river. Standing on a great when the beam suddenly gave way and he was precipitated into the street below. By a curious accident a dray covered with a large tarpaulin sheet building, and into this the workman fell. Oddly enough, all the injury h received was a contusion on the hand. "I, myself, once met with an acci dent which, by a fluke, just missed be ing fatal. I was standing on a roof coping stone when a gale of caused me to turn. In doing so I slipped, and fell over the coping stone By a remarkable chance I caught hold of the stone, and hung there for four minutes until assistance came. I suffered no injury, but there was one

thing that happened-my hair turned from black to grey. "Money made in house-breaking Yes, so, so! One well known house breaker died worth £25,000; and I know one or two others who are making good money at the work."

A Houlton, Me., letter of Oct. 11th the Woodstock Dispatch says: F. P. Barnard, station agent of the Bangor & Aroostook Railway Co. at Houlton, accompanied by his wife, left town Monday afternoon for a camptan has just delivered the first of a ing trip, having a car nicely fitted up series of lectures under the auspices for shelter, and a set at Summit sidof the Young Women's Christian ing, near Staceyville, on the line of Guild. The subject was Canadian Development. In the course of his reclimbing a ladder leading up to the marks the principal said: "A number car Mr. Barnard's gun was accidentally discharged, the contents passing through his heart, killing him instantly. Some section men happening station and wired the sad tidings to test poet, and in public life I Houlton in time for friends to catch a west-bound train and go down the public men of the higher type as Car- line to meet and render what assistance they could to Mrs. Barnard, who was alone with her husband's body Barnard was 27 years of age and a native of Granville, N. Y., but was for some time station agent at St. An drews, N. B., where he married the daughter of Thomas Armstrong two years ago. Upon the opening of the his position on the Canadian Pacific to take a similar one under his old manager, F. W. Cram, with whom, as with the public, he has ever been a emplary life and habits and much re spected and liked in this community

THE FASTEST BOAT IN THE

(New York Herald,) We have now more information as to that latest wonder in marine achiein England for the Russians by Yarrow. She is 190 feet long, by 118 feet 6 inches beam, with twin screws. Less than 4,000 horse power turned these screws at the mean rate of 405.15 times per minute in a three hour run, which put after the Solok's name a mean speed of 29.726 knots. Aluminim and alloys of bronze were used in her construction, with no less care and devotion to detail than were be-stowed on the building of the Defenspeed of 32 knots, or a little short of

37 land miles per hour, the highest ver obtained from any vessel. For the moment, supremacy of this sort belongs to Russia; but there are boats with a guarantee for 30 knots building for the British government, in the expectation that, like their predecessors they will go a knot or so beyond that figure. Perhaps, after the great attention which has been given to the development of this type of boat, we may be already hovering on that mysterious line where the relation of speed, and power as we know it suddenly changes, and instead of a little more speed for the addition of great power, a little more much more speed

THEIR GOLDEN WEDDING.

Mr. and Mrs. Geo. Coram, Who Were Married in Carleton 50 Years Ago.

A pleasing social event-all the more pleasing, perhaps, on on account of its rarity—took place last Thursday at the residence of B. F. Young, where a goodly company had assembled in response to informal invitations issued that morning. The affair had been so quietly arranged that surprise was the predominant element among the guest of an, shortly after s. Geroge Coram as all the more ant of the youth ful appeara have travelled the journey of life together, since George Coram and Anna Bond were married at Carleton, St. John, on the 10th of Octo-ben, 1845 - Lety presed were Messrs. Oscar and Joseph A. Coram of Lowell, Mass., who had come to help celebrate the fiftienth year of their parents' marriage, Joseph am having come all the way Montana on purpose to be present. Mrs. Campbell of St. John, a niece of the honored couple, was also present. The evening was pleasantly spent many reminiscences of the past, and before the guests separated Rev. Mr. a century ago to love and cherish each other for twenty-five years to come, and ended with an address containing amusing anecdotes of his

clerical experience in matrimonial af-As the object of the invitations was not announced, no wedding presents were received or expected from the guests, but the happy couple were not without golden remembrances, they received three hundred dollars in gold coin. Among other presents was a beautiful gold mounted meerschaum pipe for Mr. Coram and a their former family doctor in Lowell.

AN APOLOGY TO THE ADMIRAL.

collision between a carriage, alleged to be owned by his excellency Vice-Admiral Erskine, and in which the admiral and Captain Colborne were alleged to be driving, and a buggy owned by John Lewis. The buggy was damaged to the extent of \$12, for which Lewis, through McDonald & Jones, made a claim on the admiral. His excellency replied, denying that either himself or Captain Colborne were in the carriage, and pertinently suggesting that "a closer examination should of the accident to Lewis' buggy before the extreme measure was adopted of handling a lawyer's letter, without any previous complaint having been made, to a gentleman and officer holding the position of naval commanderin-chief at Halifax." The admiral also demanded full exoneration and ample apology on account of the charge made against him. A lengthy personal correspondence ensued between the admiral and C. D. McDonald, solicitor, at the end of which Mr. McDonald apologized to his excellency. We are unable to find space for the corresondence, which is of a personal nature.—Halifax Herald.

HARD DRINKING. Mrs. O'Toole-Shure, Mrs. Clancy, can you tell me phwat is meant by

Mrs. Clancy-Oim not shure; but I think it's sitting on a rock and sipping cold water, I dunno.—Texas Sift-Earl Carroll organized Cedar Hill

association of the Patrons of Industry on Monday night of last week, at the school house below Woodstock. C. H. L. Perkins was elected president; L. Burton Bedell, vice-president; H. B. Smith, secretary; T. By-
