THE OLIVE MINE.

W. A. Preston Says It Will Open u Again Next Spring.

(Winnipeg Free Press.)

(Winniper Free Press.) W. A. Preston, superintendent of the Olive gold mine, near Mine Cen-tre, is in the city, the guest for a few days of Mr. Blackwood. Speaking of a Free Press representative on Fri-day, Mr. Preston made some extreme-ly interesting statements regarding the prospects of the Raihy Lake and Lake of the Woods districts from a mining standpoint. Mr. Preston be-lieves that the raihway now undar construction through the country will be a most inestimable boom. Up to he present none but free milling ores have been worked, although the cour-menting will be able to be introduc-ed and mining on an immessive larger soile. In addition to this, the cost of mining and milling the free milling and operations on a far larger and more profitable scale will be carried on. R. Preston explains the fact of the

"The value of the coal fields of the United States is well known, as are the energy of the people and their ex-traordinary resources. The Latinized republics of North, Central and South America have been less recognized than they should be. The Argentine is already a great rival of England's own colonies in the south seas in the production of foodstuffs. The progress of South America, up to the present

of South America, up to the present has been retarded by revolutions; but in a short time the two Americas will be marching to conquer in the front rank. This progress would only be ac-celerated by quarrels between France and England."

PARIS Feb. 11. The Gaulois today PARIS, Feb. 11. The Gaulois today says that at the obseques of Queen Victoria, during the reception at Wind-sor, Emperor Willism perceived near him a group consisting of M. Pierre, Paul Cambon, French ambassador to Great Britain, Vice-Admiral Bienaime, the head of the French delegation at-tending the funeral, and Gen. Dubols. Addressing M. Cambon cordially, his makesty said: majesty said: "Well, M. Cambon, are you not con

"Well, M. Cambon, are you not com-ing to greet me?" and as the latter approached the emperor added: "I wish it to be well known that I love France very much and shall never al-tow her to be touched.". "Sire," replied M. Cambon, "I thank your majesty for what you have been good enough to say. France is a peaceful country, but if ever she is attacked she is capable of defending herself."

STONED PRIESTS AND CONVENTS.

MADRID, Feb. 10.—At Valladolid yesterday, at the close of the lectures, the university students demonstrated against clerical establishments, stoning the convents and monasteries. It was hecessary for the gendarmes to charge them, and a municipal guardsman was younded. Thereupon the students marched to the Jasuit college, shouting "long five liberit," and "Down with the fesuits."

the Jesuits." Today in Valladolid the Franciscans who appeared in the streets were ston-ed and compelled to take refuge in the tawn hall. At Barcelons yesterday a Sroup of students demonstrated in front of the seminary, shouting, "Long live liberty" and "Down with clerical-fsm." They were dispersed by the po-lice.

more profitable scale will be carried on. Mr. Preston explains the fact of the free gold mines in the district all be-ing closed down at present on the ground that the money market is very close and it is impossible to raise money on stock for the purchase of expensive machinery. The Olive will, however, open up again next spring and Mr. Preston has the fullest faith in the wralth producing capabilities of the property. Mr. Preston says that it is now known beyond a doubt that the min-eral wealth of the country is as var-ied as it is rich. In the Calm Lake and Anticokan districts there are large and valuable deposits of iron and near Calm Lake gold is also found. At Nickel Lake there are extensive looking deposits of aulphite of iron, pyrrhotile and copper. This lake is about 18 miles east of Fort Frances and the rock cuting in railway con-

"What are the prospects of the country from a lumbering standpoint." was a question asked Mr. Preston. "You may judge from the fact," he answered, "that this year's cut of logs will be more that 40,000,000 feet, besides a great amount of timber used in rati-way construction. There is unlimited water power in the country and as spruce and popler are found in abund-ance there is no doubt that the pulp industry will assume farme persone at the pulp large p
