

"THE GAME IS MORE THAN THE PLAYER; THE SHIP IS MORE THAN THE CREW"

Rudyard Kipling Sees One More Fringe of Grand Fleet

Dangers of Patrol Work Vividly Described—The Men in Charge from Lieutenants to Admirals—Mines and Zeppelins Their Prey.

(BY RUDYARD KIPLING.)
(Copyright, 1915, by Rudyard Kipling.)

V. PATROLS.

Be well assured that on our side
The untroubled Heavens fight
Through headlong wind and heaping tide
Make us their sport tonight.
By force of weather not of war
In jeopardy we steer,
Then welcome Fate's discourtesy
Whereby it shall appear.
How in all time of our distress
And our deliverance too
The game is more than the player of the game
And the ship is more than the crew.

Be well assured, though wave and wind
Have mightier blows in store,
That we who keep the watch assigned
Must stand to it the more;
And as our streaming bows rebuke
Each billow's baffled career,
Sing welcome Fate's discourtesy
Whereby it is made clear
How in all time of our distress
And in our triumph too
The game is more than the player of the game,
And the ship is more than the crew.

Be well assured, though in our power
Is nothing left to give
But time and place to meet the hour
And leave to strive to live,
Till these dissolve our order holds,
Our Service binds us here,
Then welcome Fate's discourtesy
Whereby it is made clear
How in all time of our distress
And in our triumph too
The game is more than the player of the game,
And the ship is more than the crew.

V. PATROLS.

On the edge of the North Sea sits an admiral in charge of a stretch of coast without lights or marks, along which the traffic moves much as usual. In front of him there is nothing but the east wind, the enemy and some few of our ships. Behind him there are towns, with M. P.'s attached, who, a little while ago, didn't see the reason for certain light orders. When a Zeppelin or two came, they saw! Left and right of him are enormous docks, with vast crowded sheds, miles of railway tracks, and a loading with all manner of supplies and crowded with mixed shipping.

In this exalted world one met staff-captains, staff-commanders, staff-lieutenants and secretaries, with paymaster's orders that they almost ranked with admirals. There were warrant officers, too, who long ago gave up splashing about docks barefoot, and now check and islets. Said one of the venerable, untruthful lieutenants, "No! A man can tell Mr. So-and-so with a money bag, but he can't tell the storekeeper's gone away—right away—with the key of these stores in his pocket. Understand me? In his trousers pocket."

He shorted at my next question. "Do I know any destroyer-lookouts?" said he. "This coast's rank with 'em! Destroyer-lookouts are born stealing. And what they don't pinch they take in by force. It's a money game, a busy to practice forgeries, or to be in gaol. Engineer-Commanders? Engineer-lookouts? They're worse! Look here! If my own mother was to come to me begging for a gun, I'd give her the f.d., I'd think twice before I'd oblige the old lady. War's war, I grant you; but what I've got to deal with is crime."

Cases Which Were "On Charge."

I referred to him a case of conscience in which everyone concerned acted exactly as they should, and it nearly ended in murder. During a long action, the working of a gun was hampered by some empty cartridge cases which the lieutenant in charge made signs (no man could hear his neighbor speak just then) should be heave overboard. Upon which the gunner rushed forward and, meekly, other side that they were "on charge" and must be tallied and accounted for. He, too, was trained in a strict school. Upon which the lieutenant, but that he was busy, would have killed the gunner for refusing orders in action. Afterwards he wanted him shot by court-martial. But everyone was voiceless then; and could only mouth and croak at each other till somebody laughed and the pedantic gunner was spared.

"Well, that's what you might fairly call a naval cruise," said my friend among the stores. "The lieutenant was right. Mustn't refuse orders in action. The gunner was right. Empty cases were on charge. No one ought to chuck 'em away that way, but damn it, they were all of 'em right! It ought to have been a case of the line and the home waters. The traffic and fishing are always with us."

The blackboard idea of it is always to have stronger forces more immediately available everywhere than those the enemy can send. Then X calls Y plus Y a scout with A, who, in turn, calls Y B a scout and possibly A2 with a

VIOLENT ATTACKS OF DYSPEPSIA

Suffered Tortures Until She Tried "Fruit-a-tives"

St. Jean de Matha, Jan. 27th, 1914.
"After suffering for a long time with Dyspepsia, I have been made well by 'Fruit-a-tives.' I suffered so much that at last I would not dare to eat for I was afraid of dying. Five years ago, I received samples of 'Fruit-a-tives,' and after taking them I felt relief. Then I sent for three boxes and I kept improving until I was well. I quickly regained my lost weight and now I eat, sleep and digest well—in a word, I am fully recovered, thanks to 'Fruit-a-tives.'"

Box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid on receipt of 10c.

sub. together left the bridge for a cup of tea. ("In those days we took mines very seriously, you know"). As they were in act to drink they heard the hateful sound again just outside the wardroom. Both put their cups down with extreme care, little fingers extended ("We felt as if they might blow up too"), and slipped on deck as they met. The focal also on tiptoe. They pulled themselves together and asked severely what the focal thought it was doing. "Beg pardon, sir, but there's another of those lightning tap-tappings alongside our end." They all waited and listened to their common coffin being nailed by Death himself. But the things bumped away. At this point, they thought if only decent to invite the rescued skipper, warm and blanketed in one of their bunks, to step up and do his further pecking in the open.

"No, thank you," said he. "Last time I was blown up in my bunk too. That was all right. I think, now too, I stay in my bunk here. It is cold upstairs."

Somehow or other they got out of them after all. "Yes, we used to take mines very seriously, in those days. One comfort was, Fritz didn't seem seriously when he comes out. Fritz don't like mines."

"Who does?" I wanted to know. "If you'd been here a little while ago, you'd see a commander coming in with a big 'n' sung under his counter. He brought the beastly thing in to analyse. The rest of his squadron followed at two knot intervals, and everything in harbor that had steam up, scattered."

Presently, I had the honor to meet a lieutenant-commander-admiral who had retired from the service, but, like others, had turned out again at the first clash of the guns, and now commands—who had great ships erupting at his least signal—a squadron of trawlers for the protection of the Dogger Bank fleet.

"The Grand Fleet is the 'strong left' ready to give the knockout blow on the point of the chin when the head in throw up. The other fleets and other arrangements threaten the enemy's elephants and stomach. Somewhere in relation to the Grand Fleet lies the 'blockading' cordon which examines neutral traffic. It could be drawn as tight as a Turkish bow-string, but for reasons which we may arrive at after the war, it does not seem to have been so drawn up to date."

"Lustania Sprawled on Water."

The enemy lies up behind his mines, and ours, raids our coasts when he sees a chance, and kills sea-going civilians at sight or guess, with intent to terrify a woman or two; a fair percentage of them have been men down. They realize what it is when women go down in horrible tangles and heavings of draperies. To say that the enemy has cut himself from the fellowship of all who use the sea is rather understating the case. As a man observed thoughtfully: "You can't look at any water now without seeing Lustania sprawling all across it. And just think of those words, 'North-German Lloyd,' 'Hamburg-America'—and such things in the time to come. They simply mustn't be."

He was an elderly traveller, respectable as they make them, who, after many years of fishing, had discovered his real vocation. "I never thought I'd like killing men," he reflected. "Never seemed to me of my duty. But it is—and I do."

A great deal of the east coast work concerns mine-fields—ours and the enemy's—both of which shift as occasion requires. We search for and root out the enemy's mines; they do the like by us. It is a perpetual game of finding, springing and laying traps on the least as well as the most likely runways that ships use—a chance sea-going and wiring as the world never dreamt of. We are hampered in this, because the navy respects neutrals, and spends a great deal of its time in making their path safe for them. The enemy does not. He blows them up, because that coveys and impresses them, and so adds to his prestige.

The easiest way of finding a mine-field is to steam into it on the edge of night for choice, with a steep sea running; for that brings the bows down like a chop, and the detonating-bombs. Some boats have enjoyed this experience and still live. There was one destroyer (and there may have been others since) who came through a mine-field without being hurt. She had an idea that there was a mine-field somewhere about, and left her companions behind while she explored. The weather was dead calm, and she walked delicately. She saw one Scandinavian steamer blow up a couple of miles away, rescued the skipper and some hands; saw another trawler which she could not reach till all was over, and she walked delicately. She saw one Scandinavian steamer blow up a couple of miles away, rescued the skipper and some hands; saw another trawler which she could not reach till all was over, and she walked delicately.

The steamer Carleton, 4408 tons, of Newcastle, sailed from New York with sugar last Thursday, bound for Queenstown for orders.

ABSORBINE
WILL REDUCE INFLAMMATION, SWELLINGS, JOINTS, SPRAINS, BRUISES, SORE THROATS, HEADACHES, COLIC, POISONED BURNS, HEALS BOILS, POISONED WOUNDS, ITCHING, OR ANY UNHEALTHY SORE. It is a powerful antiseptic, and does not blister under bandage or remove the hair, and you can work the sore. \$2.00 per bottle, delivered. Book 7 free.

ONE OF THE "BLUE DEVILS"

French infantrymen have been dubbed "blue devils." In their assaults on the German trenches they are now discarding rifles and bayonets and equipping themselves instead with a steel helmet, goggles, revolver and a formidable knife. As a result the modern French soldier resembles a movie highwayman.

STRONG CAMPAIGN FOR PROHIBITION

Donald Fraser, Jr., President, and Other Prominent Laymen and Ministers on the Executive

Fredericton, N. B., Dec. 7.—Officers were elected by the New Brunswick branch of the Dominion Alliance this afternoon, and provincial and permanent policies were adopted. Donald Fraser, Jr., of Plaster Rock, was elected president.

The provisional policy includes the asking for the enactment of a prohibitory law for New Brunswick, and the support in the primaries of candidates of temperance principles. The permanent policy is divided into the heads, organization, finance and education. Under organization is the decision to employ an efficient organizer at an annual salary of \$2,000; the 12th Field Battery, after its joining the 10th Battalion from the west. With this he went through the battles of Ypres, St. Julien and Ginchey, and many others, being incapacitated at Ginchey.

Under the head of finance, a finance committee is to be appointed, a budget of at least \$4,000 is advocated with contributions from married men; all temperance societies are to be asked to assume responsibility for a certain amount to be contributed to the alliance. Under the head of education, the continued use of temperance text books in the schools is urged and also temperance, educational work on the part of churches and Sunday schools. A Dominion Alliance Sunday in all churches is also urged. The officers are as follows:

President, Donald Fraser, Jr.; first vice-president, Rev. Thos. Marshall; second vice-president, Rev. W. H. Smith, Bishop of Fredericton; Rev. W. G. Lane, St. John; Michael Kelly, St. John; Rev. P. L. Jobb, New Mills; Rev. J. A. MacKellan, St. John; Rev. J. E. Purdie, St. John; Rev. W. G. Clark, additional members of the executive, Rev. W. G. Lane, St. John; Rev. J. E. Wilson, Fredericton; Rev. Percy Fitzpatrick, Moncton; Rev. S. Porter, St. John; E. S. Henning, St. John; Mrs. M. L. Stevenson, Fredericton; Mrs. J. W. Searmour, St. John; Mrs. A. C. M. Lawson, Fredericton; J. M. Lemont, Fredericton; George A. Fawcett, Sackville; Rev. F. C. Ryan, Tobique; Rev. Mr. Barraclough, St. John; J. Ward Smith, G. E. Barbour, St. John; Rev. N. W. Vroom, St. John; Rev. W. H. St. John, St. John; Rev. R. H. St. John, St. John; Rev. H. A. Goodwin, Rev. G. C. Drinnon, St. John; Jackson, Moncton; T. H. Somerset, St. John; C. N. W. Searmour, St. John; Rev. W. C. Kelstead, Fredericton; John Novels, Sackville; George V. Clarke, Rexton; H. H. Stuart, Newcastle; W. B. Evans, Minto; Rev. J. G. A. Belyea, Fredericton.

During the afternoon session there were addresses by Major C. G. Pincombe, of the 10th Battalion; Rev. Richard Opie, president of the Methodist conference; members of the W. C. T. U.; and others. The report of the secretary-treasurer, A. O. M. Lawson, of Fredericton, was adopted. His Lordship Bishop Richardson said he was ready to put himself on record as being ready for prohibition.

William the Crusader.
(New York Telegram.)
Folled in the west, the Kaiser has now turned his face to the east. It will be remembered about a year ago he had a dinner engagement in Paris he failed to keep. Now he's going to Constantinople, or says he is. But he's so changeable. Better put on an extra portion of pillow, however, and have a muzzle's outfit laid out for him, for he may be obliged to climb up in the minaret and make a few remarks at sundown. Besides, the robe will hide the red cross of the Crusader, which is not popular in Turkey. Never do for his majestic search of a plimsen to drop in to the Bastinado at the corner of Bowstring street and Backsheesh alley wearing his Richard Coeur de Lion make-up.

"I see a great magnate has tried digging coal in one of his own mines." "Now he may realize what hard work it is and raise wages." "Yes, and he may feel justified in raising the price."

If this name is on the barrel you can buy with confidence.

PURITY FLOUR
More Bread and Better Bread

RECENT INVENTIONS OF INTEREST TO AGRICULTURE

(By C. J. Lynde, Macdonald College, Province Quebec.)
(Registered in accordance with the Copyright Act.)

BRIDLE.
It is claimed that a horse which "pulls on the bit" may be easily restrained by the use of this invention. The inventor has employed the well known device of pulleys, using two on each side of the horse's neck. The larger cut represents this bridle in use on a saddle-horse, and the smaller cut shows how the rein passes around the pulleys. This arrangement multiplies by three the force applied to the rein by the hand.

FENCE-STRETCHER DEVICE.
This device consists of two semi-cylindrical sections, held together by bolts, and in proper position to catch other by plates on the ends of each section. In operation a half cylinder is placed on each side of several wires and the bolts screwed up. A handle at right angles to the cylinder is inserted in one of the two holes in the middle, and the cylinder is turned. Another handle is inserted in the other hole and allowed to hold against an adjacent post. In case of one wire being slack than the others, an extra curved plate (1) is placed on the cylinder to take up more wire in rotating. The edges of the two half cylinders are rounded to prevent cutting the wire.

PLOW.
The advantage of a plow with an adjustable draft appliance, easily adjusted by the operator from his position between the handles is easily seen. The larger cut shows the general plan of the arrangement. The smaller cut shows the end of the controlling bar with a sprocket wheel, which raises or lowers the draft-bar, by turning the wheeled handle on the opposite end of the rod between the handles.

OIL CAN HOLDER.
Many readers will be glad to get a device that will hold an oil can securely, but allow it to be easily removed. It consists of a main plate having a large lug, pressed up to form a support to the can, and two smaller lugs, pressed down to form stops to a pivoted arm. This arm is attached by a spring to another arm, which is held firm by bending down a small portion through a hole in the main plate. Two screw holes are placed at the end of the main arm for attaching it to the machine.

PORTABLE CHICKEN COOP.
To one accustomed to the care of chickens, the accompanying cut will be most suggestive. The cut away portion of the side of the coop proper shows the director of the roosts, while the trap nest is contained in the small extension at the back of the covered portion. Dry food is furnished in the box at the back, wet food is put in the trough at the opposite end. The sides of the covered portion are removable, as is the front, and the trap nest has a hinged cover.

A New Army Order.
(London Morning Post.)
In the course of a letter home once in an English line regiment, now at a base convalescent depot, says: "I saw a rather amusing thing yesterday. It was the copy of a letter written by Tommy's wife to the war office. It ran thus: 'Dear Sir,—According to instructions received by you on the white paper, I gave birth to a child on October 18.'"

People in Holland have spent their summer vacations at home this year, and the Dutch hotels have profited in consequence.

GERMAN PLOTTER DOUBLED-CROSSED

New York, Dec. 7.—United States Attorney Snowden Marshall declared today that Franz von Rintelen, the German agent who is accused of coming to this country to incite strikes in munition factories, armed with a large corruption fund, was "double-crossed" by labor men he tried to corrupt and, despite the expenditure of several hundred thousand dollars, failed to accomplish his mission in any effective manner.

Mr. Marshall gave the major credit Rintelen's failure to the stand taken by high officials in the labor organizations. Rintelen only succeeded in corrupting the subordinates. Mr. Marshall said, "He was beautifully double-crossed. A real labor leader took prompt steps to check his activities. Save for a few all strikes, none of his efforts were successful, and all the strikes he did instigate were quickly killed by the good men at the head of the unions. I am prepared to state just how much money Rintelen expended, but it ran to hundreds of thousands of dollars. He had \$500,000 in his credit in one bank."

Mr. Marshall refused to comment on David Lamar's activities in the same, beyond saying emphatically that would not be called as a witness before the grand jury, a proceeding which would give him immunity from prosecution. If sufficient evidence is obtained it is expected that indictments will be sought against the labor men who accepted Rintelen's money. Mr. Marshall stated that these men could be prosecuted under the Sherman law, on the ground that they had conspired to restrain the free flow of the United States in munitions. Rintelen is at present held a prisoner of the British authorities in the Tower of London. No attempt will be made to extradite him, as Mr. Marshall says offence is not extraditable.

Samuel Gompers, the labor leader, who made repeated statements in public that he knew strikes were being organized by the agents of a foreign power, may appear before the grand jury. Mr. Gompers is said to be on his way to Washington for the week. He expected to come here shortly.

The arraignment of Robert Fay, Wal-Scholz, Bax Breitung, Dr. Herbert Enzels, and Paul Bronkhorst, who were indicted yesterday on a charge of conspiracy to commit murder in connection with plots to blow up munition plants, was today put over to Monday. Paul Daeche, who was also indicted on the murder charge, is in Jersey City, and was ordered to return to this jurisdiction, but has decided to fight extradition and will take an appeal to the United States Supreme Court.

CHR. WM. L. ELKINS AND CARGO TOTAL LOSS
The schooner William L. Elkins, which left from this port last Friday, has been ashore at Portland Head and is a total loss. Word to this effect was telegraphed by Captain Berryman yesterday. J. Willard Smith, her agent in St. John. The schooner, which is 220 tons, is bound for New York. According to reports already received there will be no loss of ship or cargo. She is full of cargo.

The William L. Elkins was an American schooner and had been a regular trader between St. John and Atlantic City for years. The cargo of fireworks was valued at \$11,000 and was shipped to Mr. Urquhart, of Yarmouth (N. S.), where is insurance on the cargo but none on the vessel.

Our greatest glory is not in never failing, but in rising every time we fall—infucius.
