Canada's Leather Industry

The leather industry of Canada trial activities of the Dominion. the year 1921 there were 118 plants engaged in the industry in Canada in which a total of \$32,137,488 was inwested. These plants gave employment to a total of 4,208 people, who received in wages and salaries the sum of \$4,081,062 during the year. The total Canadian leather production in that year was valued at \$22,905,528. Of the total plants 5 were situated in Nova Scotia, 2 in New Brunswick, 64 in Quebec, 40 in Ontario, 2 in Mani-toba, 4 in Alberta and 2 in British

The progressive growth of the industry is exhibited in every feature. There were only 100 tanneries in operation in 1920 in comparison with operation in 1920 of the 119 in the following year. Twelve were added in Quebec, 3 in Ontario, 2 in Nova Scotia and 1 each in Alberta and Britis Columbia. The capital insted in the industry in 1920 was \$29,vested in the industry in 1520 was \$25,739,987 in comparison with \$32,137,488 in the following year. Owing to the depreciation of prices the value of protion was lower, being \$22,905,528 in comparison with \$39,967,831.

comparison with \$39,967,831.

The principal items in point of production were sole leather and upper leather. Though Ontario falls below Quebec in the number of plants it leads in the value of production with of \$18,900,556. Quebec fell very far behind with \$3,517,555. The Maritime Provinces accounted for \$268 192 and the Western Provinces

years, there has been an almost exact balance between the import and export trade. Total imports in the year 1921 amounted to \$4.059,222 in comparison with \$8,467,528 in 1920 and \$11,143,556 in 1919. The chief articles of import are waxed or gi zed skins, glove leathers and upper leathers. The corress.

Lawn Mower.

To see the manner :. which a dandetion plant spreads itself close to the guite common in that country. Menground on a lawn kept closely cut is nard occurs as a variation sometimes bleacher, and "bleger" is the Danish. almost to believe that the dandelion is possessed of the power to think and is possessed of the power to think and to reason out a way to circumvent the constant menace from the whirring lawn mower. In tall grass the dandelion grows upright, taking the form of the erect growing. Cos. Lettuce, or the erect-growing Cos Lettuce, or Swiss Chard. Now, if that grass is cut and kept cut the dandelion plant that

Swiss Chard. Now, if that grass is cut and kept cut the dandelion plant that formerly sent its leaves almost perpenlicularly into the air sends them out almost horizontally.

Why? If you will take a tin can and a glass Jar and place them over dandelion plants on the lawn and leave them undisturbed for a day or two you will be astonished at the difference in the growth of the two plants. The dandelion growing under the glass jar will be found apparently just as it was in the beginning.

But when the tin can is removed a plant will be seen that is shooting its leaves up into the air just as did the dandelion in the tall grass. Light causes the upper sides of the leaves to grow more rapidly than the lower sides, so that they more closely ap

sides, so that they more closely proach the horizontal as the light be-comes more intense. In the shade of the tall grass or the tin can this stimulus is removed and both sides of the Good people bow in sober pro leaves growing uniformly, they grow in worship earnest and devout-
