

### THE DOVETAILED LATH

### WALLS OF STUCCO

for Warehouses, Factories and Employees' Homes, are rapidly constructed, handsome in appearance, permanent, and very low in first and upkeep cost, when the foundation for the stucco is

## BISHOPRIC STUCCO BOARD

This modern building material is made of kiln-dried lath, bevel edged, imbedded under terrific pressure in toughened Asphalt-Mastic, surfaced on the other side with sized sulphite fibre board. It comes in sheets 4 ft. wide and 4 ft. to 25ft. long, ready to be nailed direct to the studding, lath side out, as a foundation for stucco outside or plaster inside the building. The dovetailed spaces between the lath make perfect keys, and the stucco never cracks or falls away.
