will be a great manufacturing province. Levis located as it is should hold in this busy hive of industry with its many advantages foremost place and it can be made so. Let its advantages be made know. Let new industries be brought here. Let the music of new and larger factories be heard and it will take its place with the City of Quebec, as a sentinel guarding the gate way to Canada's manufacturing and commercial greatness.

CONCLUSION

La province de Québec possède 75 pour cent des pouvoirs d'eau du Canada, les plus belles forêts du monde, un service exceptionnel de transport par eau et par voie ferrée; sa population intelligente et courtoise augmente d'année en année; et elle doit naturellement devenir une grande province manufacturière dans laquelle Lévis devra occuper une des principales place.
