

A cupboard for storing these will be necessary. If the school has a furnace or a stove which is not well adapted to this work, an oil stove should be supplied. The equipment may be placed in the basement (Fig. 2) or in a small anteroom (Fig. 3). If the classroom is large enough, it may be placed at the back of the room. When erecting a new school house, provision should be made by having a small workroom off the classroom.

The following lists will give a definite idea of the requirements for the noonday lunch. They have been used in schools in this province and are quite satisfactory:

Equipment for Noon Lunch

1 saucepan.....	\$.30
1 saucepan (straight sides).....	.50
2 saucepans (small).....	.25
2 frying pans (25c each).....	.50
