

known as the University (or 25th Street) Bridge, is a handsome, arched structure of reinforced concrete, which cost approximately \$600,000.00 to construct. It is generally admitted that there is no more beautiful bridge anywhere. Four of its ten arches have a span of 150 feet—the longest in Canada.

Three of our five bridges joint the central portions of the City, two of them being for vehicular and pedestrian traffic, while the third carries the Canadian National Railway tracks and has a foot bridge alongside. The remaining two, one in the northeast and the other in the southwest portions of the City, are railway bridges and carry, respectively, the Canadian Pacific and Grand Trunk Pacific rails. The existing bridges, with their lengths, are as follows:
