31	M	7th SUNDAY AFTER TRINITY—Grey the poet d., 1771	4 47	7 25	4 52	7 20

ANCIENT ALMANACK.—The antiquity of almanacks is much greater than has been supposed. One used by the Romans was some time since discovered at Pompeii. It is engraved on a white marble slab, found in the vicinity of the gate of Isis; it contains the various months, arranged by threes in vertical columns; each column is headed with the corresponding sign of the zodiac, and curious indications as to the agriculture and religion of the Romans are interspersed here and there. Below the sign of the zodiac and the name of the month, the name of every day in the week is inscribed.

COAL.—During the last fifty years the use of coal has increased enormously, in a great measure through the growing use of steam-power. The annual coal production of the world is now estimated as follows:

Great Britain, 104 million tons; North America, 32 million tons; Germany, 17 million tons; Belgium, 12 million tons; France, 10 million tons; Other countries, 7 million tons. Total, 172 million tons. Total value, \$357,000,000.
