

THE GOULD BALANCE VALVE

express their gratitude to their 6,000 customers of the United States and Canada for their generous response to inquirers asking information, for their readiness to show the working of the valve on their engines, and for their part in helping to make the Gould Balance Valve an engine necessity.

Beginning in obscurity, it has the endorsement of users and owners, of manufacturers and mechanical writers, and in the six years it has grown from an untried article to a necessary part of an up-to-date engine.

Warranted to increase the power from 18 to 30 per cent. Warranted for five years against defect or wear.

GOLD BALANCE VALVE

KELLOGG,

The Biggest Engine.

It was told in the caboose after an ordinary day's threshing, the boys were all laid in the bunks enjoying themselves and it came about in this way. We had for an engineer a new settler, but an ordinary enough engineer, in most ways, and likewise a separator man, a newcomer also, about the same calibre and, any good day's threshing, good piece of roading,

day's plowing, or large crops, or fine horses and especially big engines and separators—why it didn't matter what it was or who said it, but it would be from either one of 'em, "Aw, that ain't too bad, but you should ha' seen what Hank and I done with Old Man Lo. Lo's outfit way down someplace and way back in the nineties, that was goin' some? eh Hank," who would chip in, "you betcher," and none of us could

mention anything big, but one of these fellows had seen something someplace that would put us all in the shade, and the boys all got plumb sick of it.

Well it wasn't a hundred miles from Winnipeg, and it so happened that the gang was picked up around home, all neighbors, most of them were farmers' sons out as much for the fun as anything else, and these two fellows were the only strangers in the bunch.

When we had got about half through the run, we got to a place, darned good place too, and the Boss went by the name of Old Bill, who, by the way was an old thresherman himself, and a good one too and he could tell a first class story, and when he came out to meet us and show us where to pull for the night he naturally looked the bunch of us over and saw most of his friends of past days present, and in due course
