

POWER FOR FALL PLOWING

Deep Plowing requires lots of power but it produces the best seed bed, and the best crops. You probably have never plowed as deeply as you would like, because you would kill your horses if you did. But if you own a Hart-Parr Gas Tractor you will have an abundance of power at your command, a horse that never gets over-heated or tired, and can turn over 20 to 30 acres per day and as deep as you wish. Hence your next year crop will be better. That means **MONEY EARNED.**

Early Plowing is also best because it kills the weeds before the seed matures; it also conserves moisture by preventing evaporation and permitting the rain and melted snow to enter the soil instead of running into ravines and depressions, hence

forming an ideal seed bed. If you have a large farm you cannot get your plowing done early enough to do this if you use horses. But if you own a "Modern Farm Horse" which will do the work of 22 to 25 horses you can get your fall plowing done several weeks earlier than usual. Here again you are preparing for a better crop next year. Hence **MORE MONEY EARNED.**

Horse Feed is High and is going to be higher next winter. Sell most of your horses and save this heavy feed bill by buying a "Modern Farm Horse," which uses cheap **KEROSENE** for "feed," and eats nothing while standing idle. The price of the horse feed you will save this coming year will go a long way towards paying for your Tractor. **THAT'S MONEY SAVED.**

A Hart-Parr Tractor is a Money Maker—Money Saver

Let us tell you more about this "Modern Farm Horse," and its advantages on your farm. Mail us a postal card' we will do the rest. We can make prompt shipments.
