No better wire fence built than the Casey Diamond Grip. Just the thing for farmers—neat, strong and durable. Will last a lifetime, barring accidents. Uses only straight wires with so little depression as not to cause the galvanize to crack or peel. If there is a dealer who wants something better to handle than he's had, try it. We also supply the Double Lock

Wire Fence, which is claimed by some to be second to none, the lateral wire of which, as well as the upright stay, being crimped at joints. Our agents build either on premises. Agents wanted everywhere in Canada, to whom sole territory will be allotted. County and Township Rights for sale. Our Gas Pipe Frame Gate takes the lead. Patented January 23rd, 1895. See our exhibit at all the leading fairs—Toronto, London, Ottawa, Kingston, etc.

BOOK TABLE.

In writing to advertisers please mention the Farmer's Advocate.

The midsummer number (August) of Frank Leslie's Illustrated Monthly, copy of which we have just received from the publisher, is a very fine example of the progress of illustrative art and high-class periodical literature. In fact, we know of no publication in which, of recent years, such marked advances have been made, both from a literary and artistic standpoint. Since it was founded, in 1876, its rule and watchword has been "Progress and the Spirit of the Age," which this issue well exemplifies. A portrait of Mr. Leslie adorns the cover, besides which there is a colored frontispiece, "Two's Company." The contents are so varied, numerous and timely, as well as excellent in character, with a wealth of illustrations, that the Monthly must be seen and read to be properly appreciated. It is \$3.00 per annum, or 25 cents per copy. Send a postal for new premium offer to Frank Leslie Publishing House, 42 and 44 Bond St., New York City.

THE HIGHLAND SOCIETY'S REPORT.

The current number of the Highland and Agricultural Society's Transactions, being Vol. VII. of the fifth series, devotes 344 pages to an exhaustive account of the Rothamsted experiments, prepared by Sir John B. Lawes, Bart., and Sir J. Henry Gilbert. The full title of the contribution is "Rothamsted Experiments, being an account of some of the results of the agricultural investigations conducted at Rothamsted, in the field, the feeding shed, and the laboratory, over a period of fifty years." The following divisions are ably and minutely dealt with:—1. Experiments with root-crops grown continuously. 2. Experiments with barley grown continuously. 3. Experiments on the growth of various leguminous crops for many years in succession on the same land; also on the fixation of free nitrogen. 4. Rotation of crops. 5. The feeding of animals for the production of meat, milk and manure, and for the exercise of force. The volume contains much else that is valuable. The Secretary of the Highland and Agricultural Society, which continues to do most effective service on behalf of Scottish agriculture, and which issues such valuable annual volumes, is Mr. James Macdonald, of Edinburgh.
