

The Farmers' Market

WINNIPEG MARKET LETTER

(Office of the Grain Growers' Grain Company Limited, September 27, 1913)

Wheat.—Wheat ranged lower the past week, close showing losses of 1¢ for October and 2 cents for December Options. The influences causing the decline were mainly the very heavy receipts and the large amount placed for sale daily. The demand has been very good, especially the latter end of the week. Advice is that an exceptionally small amount of wheat has been sold up to the present time, so that the situation looks "bearish" to some. The Canadian wheat is being given the preference by foreigners over the grain raised south of the International Boundary, which, with the Russian wheat, is supplying the importing countries. Foreign crop conditions are generally favorable. Harvesting of wheat in the United Kingdom is well advanced, but is progressing slowly in France, as a result of unfavorable weather. Weather in Russia is generally fine for harvesting and movement.

The demand for cash grain in our market is good and at close is holding up very well in comparison to the American markets.

Oats.—More general interest shown this week than for some time and the close shows October Option up 1 cent and December 1/2 up. Demand is better and quality of grain passing is generally good.

Barley.—The demand during this past week was practically nil and prices declined over 2 cents in consequence.

Flax.—Flax held up fairly well all week and closed almost 4 cents above last Saturday's close.
