REPRESENT NEW ZEALAND

London, Feb. 7.—A dispatch from Wellington states that the cabinet has decided that New Zealand will be represented at the forthcoming imperial war cabinet and war conference, subject to the approval of parliament. Messrs. Massey and Ward will be Dominion representatives. A short session of parliament will be opened about April 9th to make the necessary arrangements

Urged Development of the Grand River

W. A. Hollinrake Laid Project Before Trades and Labor Council.

The development of the noble Grand for power, pleasure and commercial purposes was the topic of the feature discussion at the Trades and Labor Council meeting held last evening.

After qualifications had been presented, a number of delegates from the Brantford Typographical Union were received.

The auditorium was read and referred back to the auditors for corrections.

In regard to the recent movement in the T. and L. Council respecting the changing of the personnel of the Board of Public Commissioners a motion was presented favoring a committee composed of the Mayor, the county judge and the chairman of the Finance Committee. McGratton moved that resolution be passed and presented to the City Council next Monday by delegates from the T. and L. Council personally.

This was seconded by Delegate Palmerton and carried unanimously.

The president then called upon Mr. A. W. Hollinrake, who had been invited to talk to the labor men in regard to the possibility of harnessing the Grand River.

Mr. Hollinrake in the course of some well pointed remarks, stated that if the Grand was harnessed in England or in any other European country at war, it would be surely put to use for navigation and to secure power. During the sessions of last year's City Council municipalities to the south of Brantford along the course of the Grand River, were invited to attend in a body a convention. The object of this gathering was to investigate the course of the Grand, together with suggestions for its development, but for pressure purposes, Mr. Kite stated that the working man which prevented any heavy course from being possible.

There has been a growing interest in regard to the question and the Brantford Board of Trade have been investigating conditions of late. A meeting will be held in Galt tomorrow of as many of the Grand River municipalities as wish to be represented for the purpose of discussing the movement of the Grand. Mr. Hollinrake went on to state that not only would the river, if developed, be a benefit to Brantford through the power derived from it but also the working man. It would mean a better pleasure trip during the summer the working man had Saturday afternoons and evenings during which he could take river excursions.

Some years ago the river was the only means of communication that Brantford had with the outside world and the remains of the old locks and piers and some of the old canals are still in evidence in different parts of the river. Mr. Hollinrake contended that the canals should be cleared out, and the locks and dams be repaired. The river would then be navigable for boats drawing four or five feet of water from Port Maitland to Brantford. Coal schooners from Pennsylvania could come across Lake Erie to Port Maitland and up the river to Dunnville. At this place the coal could be loaded onto small barges by means of electric cranes. Small tug could bring up four or perhaps five barges. The coal could be got to Brantford much quicker, much cheaper and the service would be much better than by rail. The opening of river traffic would tend to reduce freight rates on the railroads.

Speaking on the river as a possible power utility, the speaker stated that between Elora and Brantford there was a drop of several hundred feet in the river. In the course of the river there were numerous dams, but these were for the most part, not used. Mr. Hollinrake quite plainly stated that he was not an engineer, but he believed that enough power could be derived from the Grand River to supply the needs of all the communities bordering its banks. A dam might be put where the river goes around Bow Park to Newport. There is a gulch between these places and through this a canal might be dug. There is a drop of perhaps fifty feet in this part of the river and the harnessing of the water there would derive for the use of Brantford a considerable amount of power.

From Newport there is a clear stretch of water as far as Caledonia, easily navigable. As the river near Seneca there are several rapids. The dam at Seneca has become decayed and a new dam would necessarily have to be built at this point. Between Brantford and Seneca new locks would be needed. North of Brantford no navigation could be carried on account of so many rapids being in the river course. The river development, advocated stated that wherever locks were built power could be developed for electricity. High dams at Seneca and at the Cocksfoot Road gate would be the most advisable places. He was satisfied that, not only would there be enough energy derived for the Grand River Municipalities but there would also be good river navigation from Brantford to Caledonia and thence down to the lake. People would come on boat excursions from other places

with a navigable river as an indication. The project would have considerable commercial value, the speaker claiming that there would be a tendency to create a reduction in the freight rates.

Should an embargo be put on coal coming into Canada by the United States there would be a severe fuel crisis in this country. Was it not, the speaker claimed, the duty of Canadians to do all in their power to introduce all and every means of power possible.

Mr. Hollinrake then asked that the Trades and Labor Council appoint a committee to act in conjunction with the Brantford Board of Trade and the city council in the matter, and to get expert engineers to look into the possibility of the question.

A delegate spoke of the pleasure beaches at Toronto and Buffalo, and claimed that as much enjoyment could be derived by Brantford citizens, from the Grand, if only the river was properly harnessed. He contended that it tends to alleviate coal famines, such as Brantford has experienced this winter.

Delegate Crandall gave some interesting reminiscences of what had been done in the past with the stream, at the same time heartily agreeing with the speaker's remarks.

The great Roosevelt Dam in Arizona was referred to by Delegate Palmerton, who wanted to see plans made for something on a smaller scale, such as a river in England or in any other European country at war, it would be surely put to use for navigation and to secure power. During the sessions of last year's City Council municipalities to the south of Brantford along the course of the Grand River, were invited to attend in a body a convention. The object of this gathering was to investigate the course of the Grand, together with suggestions for its development, but for pressure purposes, Mr. Kite stated that the working man which prevented any heavy course from being possible.

So far as cheap power was concerned, Delegate Kite said that the laboring man would only get enough to subsist on anyway, no matter how cheap things were. The project would not be a benefit to laboring men. This was Mr. Kite's plain opinion of the matter, and though he did not want to knock any good thing down he could not with a clear conscience act on a committee for the purpose of harnessing the river for pleasure purposes. Delegate McGratton said that during the summer the working man had Saturday afternoons and evenings during which he could take river excursions.

Delegate Crowley stated that there would be plenty of work for the laboring man in working on the river. We could get plenty of excursions to come here, and this means an advertisement of the municipality, which would not only benefit the capitalists but also the working man. It would mean a better pleasure trip during the summer the working man had Saturday afternoons and evenings during which he could take river excursions.

Delegate Alderman Symons spoke of the great benefit to everyone it would be to have more sources of income in the city. It would be a benefit to humanity, and the working man does not want to always remain a wage slave, it would only go to policy to advocate anything that would make the world better. He asked that the Trades and Labor Council boost the movement, not knock it.

President Stinchcombe then rose and stated that as the Trades and Labor Council was the most public speaking body in the city, it was on their proper that they should boost anything that would be a benefit to the community. He did not think the proposal was to capitalize the project with private subscriptions, making it capitalistic, but the project was to have a publicly owned river and canal system. Therefore, as members of trade unions, the president called upon the Laborites to stand behind the organization which grants for public ownership.

It was moved by Delegate McGratton that a committee be appointed composed of five members of the Council to act in conjunction with the Grand River Conservation committee regarding the possibilities of developing the Grand River. Delegate Palmerton seconded the resolution, and it was passed by the council.

The committee was formed of President Stinchcombe, Delegates Crowley, McGratton, Palmerton and Innes. Alderman Symons then spoke on the plumbing by-law, which has been brought up in the city council previously but nothing done in its connection. He proposed to amend the fact that no citizen can do any plumbing for himself without first getting an application to the city engineer signed by a licensed plumber. This clause was a joker in the motion, and made the resolution worthless so far as the laboring man was concerned. He proposed to amend the resolution so that it would be possible for any citizen to do plumbing work for himself, so long as the work was done properly. He asked that the members consider the question at their leisure.

I Have Been Told That Professor Donders--

A high and competent authority— Has often said that "Eyestrain causes more headaches than all other causes combined." Patent medicines and headache powders cannot relieve this condition. On the contrary, they tend to aggravate it. If you are a headache sufferer, I would suggest that you visit our Optical store and allow us to show you what a difference just a little intelligent thought and understanding will make.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

The sole head of a family, or any man over 18 years old, who was at the commencement of the present war, and has been a resident of the Dominion since the beginning of the war, or a subject of an allied or neutral country, may homestead a quarter-section of available Dominion Land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at Dominion Lands Agency or Sub-Agency for District. Entry by proxy may be made in certain conditions. Duties—Six months residence upon and cultivation of land in each of three years.

In certain districts a homesteader may secure an adjoining quarter-section as pre-emption. Price \$200 per acre. Duties—Six months in each of three years after earning homestead point and cultivate 50 acres extra. May obtain pre-emption patent as soon as homestead point on certain conditions.

A settler after obtaining homestead patent, if he cannot secure a pre-emption, may take a purchased homestead in certain districts. Price \$200 per acre. Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.00.

Holdings of entries may count time of employment as farm labourers in Canada during 1917, as residence duties under the Act. When Dominion Lands are advertised or posted for entry, returned soldiers who have served overseas and have been honorably discharged, receive one day priority in applying for entry at local Agency Office (but not Sub-Agency). Discharge papers must be presented to Agent.
