To Our Subscribers.

On and after Jan. 1st, 1899, the Reporter, in common with all other weekly papers published in Canada, will have to pay postage on all papers sent to subscribers living more than 20 miles from the office of publication.

As this will require a large sum to our running expenses in publishing the paper, we find it necessary to announce that all subscriptions to the Reporter must hereafter be paid in advance. We have exercised a large amount of patience in waiting on our subscribers until the total amount due us is considerably over \$1,000.

We have repeatedly demanded delinquents, both through the paper and by agents, but there are hundreds who have paid no attention whatever to our appeals. This week we have placed a lot of subscription accounts in the hands of a collecting agency with orders to collect, even if they have to place the accounts in court for that purpose, so that any one receiving a notice will understand that we mean business and if they wish to save costs they will require to forward to the agency at once.

The Warrington Failure. The rumored failure of the Warringtons of Montreal, who were extensive exporters of Canadian cheese, has proved only too true. The worst is now known, and it is about as bad as it can be. The patrons of the factories (chiefly east of this county) are interested to the extent of 47,952; sundry creditors are owed a total of \$5,000; and the indirect liabilities are placed at \$1,000,000. The latter is for cheese bought and not yet realized upon and there may be no loss upon it. Factories in the Winchester district are creditors to the amount of \$14,815, and a deputation went to the Warringtons to see the Warringtons. They were assured that the factories would not lose a cent, so the failure may not prove so serious as has generally been supposed.

The Warringtons were large buyers of the Church of St. Thomas Hamilton, which is purely a matter of luck that the factories of this district are not concerned in the failure. The Juncton factory is listed for \$350, but otherwise this section escaped.

Learned from the Warringtons that the failure is obvious, and a general move is being made towards shortening the time between the delivery of goods and payment. The Frontenac board does not want to be chosen.

The Montreal Gazette sums up the situation by saying that the factory men have the remedy in their own hands, viz.: "to demand payment in a reasonable time after delivery, if not promptly upon it."
