Do you wish to hear any particulars of the affair?" light he was seeking break in upon this seemingly common-place history. Then, indeed, he appeared to catch a glimpse dow, threw it up, and took a deep of something that might lead him out breath of the cool February air; then of the maze his imagination had he came back, a trifle haggard, a trifle wrought for itself, and he addressed wan, but outwardly composed.
"I most certainly do," he returned; his attention to the remaining letters of the packet with renewed interest. but first reassure me in one re-But beyond a kindly word here and gard. My wifethere, and some expressions of relief that Mrs. Farley had had the courage to resign a portion of her burden in order that the rest might be sustained, he found nothing to corroborate his suspicion till he suddenly stumbled upon these words at the beginning of a letter dated from New York: "I have news for you, I have seen her, and she is as much like Mildred as any little lady brought up in the lap of luxury could be like a child who has not always had two little shoes for her feet. I met her as she was going to school. I was on the sidewalk in front of the house and she passed so near me I could have caught her in my arms. Why didn't I? She would only thought me crazy, and that wouldn't have done me any harm, while the letting her go by me as if her sweet body did not contain a drop of my blood, did. But her rich dress and the haughty way in which she held her head, overawed me, and I did not even follow her down the street, although I own my heart went after her almost as much as if she had been my own child. What grief, what longing must be yours! I appreciate it now that I have seen with my eyes this fac simile of the darling you have retained for your own solace." And this letter was signed Annie like the rest, and

bore a date only ten years back. After this Mr. Gryce was not astonished to find a change in the direction of the epistles addressed to Mrs. Far-From being sent to a small town in Ohio, they were now inscribed to a certain number in Bleecker street, New York. The widow had moved herself and child to the great metropolis, and henceforth recognized the fact that a stern conflict was going on in her breast, that, added to her daily strugfor bread, was fast undermining what little health she had.

At last, words of condolence took the place of words of hope, as the two struggles culminated; followed by sudden congratulations that she had found strength in her weakness, and had not only been saved from breaking a most solemn oath, but had found in the child who shared her life and fortunes a help and comfort that would yet compensate her for all she

had lost and suffered. And then a sudden failure on the part of Annie to write; with hurried lines, manifestly from some other member of this same Annie's household, in which hope was expressed that Mrs. Farley was well, and news given of the invalid, as Annie was henceforth called: winding up with this single injunc-tion in the old handwriting: "Do be careful; Mildred's happiness as well as that of the other depends upon keeping things as they are. Remember your

And the packet was exhausted. But what had he not learned? Or, at least, what was he not at liberty to surmise? Procuring the date at which the first mention of Mildred was made, and storing up in his deep memory the name of the town from which came those letters signed Annie, he left Mrs. Olney, with a sense of great professional complacency, notwithstanding the secret dread which sprang from his benevolent nature of being upon the track of a crime destined to plunge a beautiful woman and a noble man into a pit of shame and dishonor.

What he did with the facts he now gleaned and what followed his pursuit of the unknown Annie to her place of residence I leave him to tell for himself in the ensuing chapter.

> The Sports and the Baseball Match-A Big Crowd and a Good Time.

The "Advertiser" building on Saturday was quieter, if possible, than the shop of the merchant who sneers at printer's ink and advertises not. The silence was so dense it could be felt by the lone office mouse as he nibbled at the paste pot on the editorial room shelf, while the office cat looked on from the floor below and sighed for a stepladder. It pervaded the place from the top flat, where the click of the Linotype type-setting machines was silent, to the gloomy depths of the basement, where the wheels of the gigantic web press had ceased to revolve and the endless web of paper to unroll. The busy hive of industry was silent-and the bees were at play.

In other words, it was the "Advertiser's" annual picnic-the day when everybody from the chief editor down to the latest acquired carrier boy (the coming editor), is supposed to enjoy himself. The scene of enjoyment this year was Port Stanley, and the "Advertiser" has gone farther away from home and fared a great deal worse from the enjoyment point of view than it did on Saturday. The Port is not too far away for a man to take his family, and not so far as to necessitate three days for the journey. Six well-laden coaches filled with happy excursionists went down in the morning and a larger train was required to carry the afternoon contingent. Superintendent Young provided splendid coaches for the trip, and upholstery was a feature with each. It had been raining at Port, as in London, the preceding night, and when the climb up the hill began the dust was nicely laid and the coolness was delightful. A steady breeze blew in from the water, and none were better able to appreciate its freshness than the printers, whose vocation is so close and

When it came to the ball match the absence of one who had for years been the moving spirit of the "Advertiser" picnic sports became more than ever apparent. The late Jesse M. Symonds was absent, but not forgotten. His presence was missed also on the committees, and the memory of his cheerful disposition and willingness to aid caused the thoughts of more than one

The "Advertiser" ball match has always been the feature of the annual picnic. Each player was out for a record and a share of the prize money. Both pitchers were hit hard and often, the results ranging from foul tips that kept the umpire—Mr. Alex. Richards—dancing a fling to escape, to hits on which home runs were made while the fielders were exploring for the ball. Talliaferro, especially, had to bat with one hand to keep the ball out of the lake or off the The crowd applauded good and plays alike, and much enjoyed guying the players when they made an error. A pad of paper and two pencils were used up in keeping the score, which, at the conclusion of the game resembled somewhat the scores made by Charley Hyman's cricket eleven. It was 26-17, in favor of the job room

team. A BOAT RIDE The waves were rolling in three at a time when the R. G. Stewart, of Duluth, began her hour and a half sail on the lake at 4 o'clock. A rush was made for favorable seats at the bow, and the first half of the way out was pleasant. Then one by one people began to get white in the face and to go below as fast as the tossing boat would permit. Every sofa in the ladies' saloon had its occupants, and many went down to the lower deck, where the motion of the boat was not so palpable. The boat's cook did a splendid business in lemons and cream tartar. Along the ship's rail heads were reclining, the owners of which had not the strength or inclination to move. The captain was at last prevailed upon to turn about and put for shore, but there are some who will remember their ride for many a day. Another lunch on the hill followed, and the majority of the picnickers returned home at 7:25 p.m., tired but "My baby had croup and was saved by Shiloh's Cure," writes Mrs. J. B.
