The Canal System. The most noticeable thing about the de-

For example, the two physicians who took part therein, both representing constituencies through which canals pass and therefore presumably more than usually interested in the question, diagnosed the case very differently. Dr. Bergin thought that the deepening of the St. Lawrence Canal should be simple and comparatively inexpensive, while Dr. Reid saw lions of most ferocious aspect in the path. It is probably true, as Col. Penison alleged, that there are no insuperable engineering difficulties in the way, the whole problem being solvable by an adequate expenditure of money. A distinguished engineer has said that any feat is possible to engineering skill, and Mr. Haggart in his remarks in the House did not dispute this position. He, however, felt that

depth which he considers is the most useful. Dr. Reid made the point that grain coming from Duluth or Port Arthur could scarcely make the journey to Montreal unbandled.

He claims that the handling of the grain will be considered the claims that the handling of the grain will be considered to the claims that the handling of the grain will be considered to the claims that the handling of the grain will be considered to the considered to t

Ind to talk of the hardship inflicted on the farming class, but before that style of argument can be allowed to pass muster the higher all these misfortunes at the hands of a cruel N.P. must be trotted out. If the individual farmer who suffers all these misfortunes at the hands of a cruel N.P. must be trotted out. If the individual it cannot be found it is safe to large the class does not exist. Let us have a respectable farmer produced on the platform, so forlorn, bankrupt and broken by the taxes which he has indirectly contributed to the public exchequer that he her to right to a close to the should stimulate each brotherhood led in which should stimulate each brotherhood in the hards of a cruel N.P.

Through Snow and Bad Roads.

D. Nasmith, the Toronto Bicycle Club's plucky and persistent road-rider, completed his third century of the season yesterday secretaries of the various city chapters spoke of the effect the convention had already had upon the chapter work. This meeting, which bore the mark of an entity manhood upon it, was brought to a close by a few words from the Was brought to a close by a few words from the Century and wheeled to Newmarket and back, 70 miles. If this fails attendance than the fourth convention of the agreement of your eighbors? Do you wish to attendance than the fourth convention of the attendance than the fourth convention of the agreement of your eighbors? Do you wish to the platform, so forlorn, bankrupt and broken by the taxes which he has indirectly contributed to the public exchequer that he her to the public exche wheeled to Newmarket and back, 70 miles. His next was out the Kingston-road to he has to give up farming. We must bar as a specimen, that not infrequent one, who contributes to the interest on the national debt, through the medium of the inland debt, through the medium of the inland revenue tax upon rye, after it has been subjected to certain manipulations; because, rye is not "a fundamental article of substence." His breakfast table is "free." On the beverages there consumed, and the sweetening of them he pays nothing. He, his wife and three children spend about \$200 a year, all told, on articles that come through the custom house, or are protected if made in Canada, and incidentally it may it is hard to say, has to submit to higher duty and more protection. Taking his out my to represent an average contribution of \$40 per annum to the revenue of the country, and this is really an extreme allowance, he pays this sum at his convenience and in average the pays this sum at his convenience and in average the pays the sum at his convenience and in the pays the sum at the su small instalments through the medium of his drygoods merchant and a few other tradesmen. Now the same man pays \$40 hard cash annually, and with the fear of the bailiff before his eyes, to the municipal taxgatherer. As a mere matter, of value for his money he gets more from the Dominion and Provincial Governments, both of which are maintained by the \$40 paid indirectly, than he does from his municipal govern-ment, to which he contributes a like sum. He does his own grumbling against the latter, but his grumbling is done for him in the former case by agitators and self-seekers who use him as a stalkinghorse. Monthly Meeting of the Nationals.

The first monthly meeting of the Nationals Baseball Club was held last evening in their rooms. It was fully attended and augurs well for the success of the club for the coming season. Already there is a larger membership than any previous year and eight new names were handed to the secretary and accepted. It was decided that the Nationals will appear on the diamond with an entire new outfit. It is expected they will make a good sense that the Nationals will appear on the diamond with an entire new outfit. It is expected they will only the new table to the secretary and the new outfit. The Globe pretends to think that the N.P. has been a failure and that the Abbott Government are anxious to abandon it for something else. This is mere clap-trap. The N.P. has been a glorious success and the probability is that it will be strengthened rather than weakened. The Glo be is the-most mendacious paper we know.

Only a newspaper lost to all idea of truth would, in sight of the recent bye-elections, declare that the N.P. had failed. It is a card of greater value in the hands of the Sovernment to-day than ever it was.

Three trains loaded with colonists left the Union Station last night for Manitoba and the Northwest. It was not a poor emigrant the Northwest. It was not a noor emigrant crowd by any means but was composed chiefly of good Ontario farmers, with lots of stock, children and cash. One hundred and thirty-eight carloads of household furniture and stock followed the passenger trains, which shows that the settlers are leaving well equipped, and in a condition to better themselves and the country wherein they settle. One coach load of such settlers is worth more to a new country than a whole army of destitute Scandanavians.
