Positive Ventilation

as well as uniform heating is insured by the Sturtevant System. The air is forced where it is wanted, not merely allowed to go. It is thoroughly distributed; a slight pressure is maintained within the building, so that all leakage is outward. Not a steam pipe is needed in any room. It is all concentrated in connection with the fan.

McNaull Economic Water Tube Boiler

Is adapted to every purpose requiring
a boiler.

It is very economical in fuel, and will
save its cost in a very few years, in this
one particular.

The floor space occupied is small com-
pared to other boilers.

It possesses absolute safety, is simple
of construction, and the cost for repairs
is practically nothing.
