

“Liebig’s,” and the public are protected against buying articles other than the original and genuine extract. In this country, on the other hand, many extracts are offered as “Liebig’s,” though utterly repudiated by Baron Liebig.—*Globe*.

—Dr. T. G. Sheats of Shady Grove, Ga., says: I have had the opportunity of trying PAPINE in a few cases. I consider it a very valuable anodyne, perfectly devoid of the disagreeable secondary effects of opium or morphine.

—The Rumford Chemical Works, Providence, R.I., manufacturers of Prof. Horsford’s Acid Phosphate, have recently purchased a commodious building and warehouse near their present location, where they propose to remove their business a few months hence. This purchase has been necessitated by the demands of their large and increasing business, and it is pleasant to record such an evidence of well deserved success and prosperity.

—It is to be regretted that many mothers do not commence the use of Mellin’s Food until their infants are sick. It must be borne in mind that this Food is not a medicine, and is not intended primarily for sick babies, but is an excellent artificial food for healthy as well as for sick infants. Owing to the careful way in which it is manufactured, the whole of the starch is converted into dextrine and grape-sugar, so that the greater part of the work of digestion is performed before the food reaches the child’s stomach. Mixed with milk and water, the Food is, as a rule, readily digested by the youngest infant.

—Experience, the greatest of all teachers, has demonstrated that, in a large number of cases, Cod Liver Oil is beneficial for a few weeks, that the patient improves upon it, gains flesh and strength, but unfortunately this improvement does not continue; right in the midst of flattering prospects the patient comes to a halt, ceases to gain weight, or otherwise improve. Physicians have experimented for years in their endeavor to overcome this objection; it has finally been accomplished by Drs. G. Overend Drewry and F. C. Bartlett of London, England, who, by means of pancreatine, have succeeded in perfectly digesting or hydrating the oil, thus giving to the profession cod liver oil in a perfectly assimilable form, overcoming the only objection to its continued use. This hydrated oil is christened HYDROLEINE, and after nearly five years of extended trial it has been extensively approved of.
