

IN AGALACTIA

there is nothing that shows results like

LACTO-GLOBULIN

From four to six teaspoonfuls daily in addition to the regular diet has a specific action on the mammary gland, increasing the flow of milk as well as its nourishing qualities and richness in blood-enzymes.

Presents a Solution by the Natural Method of most cases of difficult feeding of Infants. Is a complete substitute for, and preferable to all malt extracts.

ANALYSIS ON EVERY PACKAGE

A pure Albumen from milk, identical with the Globulin of the blood, and containing in concentrated form the valuable digestive ferments or enzymes of absolutely fresh milk. The most nourishing, stimulating and easily assimilated food known.

6 oz. Package, 50c; 15 oz. package, \$1.00.

Sold through the Drug Trade only.
