

4. facilitate binational collaborative actions to reduce the loss of native species and habitat, recover populations of native species at risk, and restore degraded habitat;
5. renew and strengthen binational collaborative actions to conserve, protect, maintain, restore and enhance native species and habitat by identifying protected areas, conservation easements and other conservation mechanisms to recover populations of species at risk and to achieve the target of net habitat gain; and
6. increase awareness of native species and habitat and the methods to protect, conserve, maintain, restore and enhance their resilience.

These programs and other measures will also contribute to recovery of populations of species at risk, restoration of degraded native habitat and species, and a net gain in habitat.

The Lakewide Action and Management Plans will be the principal mechanisms for coordinating development and implementation of the lakewide habitat and species protection and restoration conservation strategies under this Annex.

C. Science

The Parties, in cooperation and consultation with State and Provincial Governments, Tribal Governments, First Nations, Métis, Municipal Governments, watershed management agencies, other local public agencies, and the Public, shall conduct research and monitoring, as needed, to implement prevention measures that consider the climate change impacts and other stressors and improve the resilience of native species and habitat.

D. Reporting

The Parties shall report on progress toward implementation of this Annex every three years through the Progress Report of the Parties.
