This is a story of a London doctor who, being unjustly accused of forgery, has been sentenced to penal servitude for nine years, three of which have already been served. Since his conviction, the person who really did the forgeries has confessed, but owing to her inability to produce her accomplice, this unfortunate victim of circumstantial evidence and mistaken identity is still suffering penal servitude in Portland prison. Although it is *an authentic history, based on sworn evidence*, it never deviating for a moment into fiction, it is as fascinating as any detective story of romance, and it has besides the practical object of suggesting to readers who may have the capacity or the knowledge, a chance of unearthing the real criminals and liberating an innocent man.
