| 7. Alpine.      | 15. Tawny.     |
| A. Ash-coloured | 16. Bengal.    |
| B. Egyptian.    | 17. Secretary. |
| 8. Cinereous.   |                |

**L**INNÆUS describes the genus in this manner :

The bill straight ; hooked at the end only.

The head without feathers ; the skin on the fore part naked.

Tongue bifid at the end.

To which Mr. *Pennant* \* adds, that the edge of the bill is cultrated, and the base covered with a thin skin.

\* *Genera of Birds*, 1773, p. 2.
