

In harmony with this advance, we desire the Conference to place on record concerning the following matters:

1. That the Conference having been memorialized by the Vancouver Methodist Sunday-school Association to consider the advisability of entering into a co-operative movement with other Churches in carrying forward convention and institute work with a view to a larger co-operation than has hitherto been manifest, such memorial having been endorsed by a number of the districts in Annual District Meeting and a communication having been received from the Synod of the Presbyterian Church at its recent session, enclosing a minute of proceedings, approving the same end and means, we recommend that the Conference give endorsement to this principle, and appoint a committee of eight members to give practical direction to such movement in co-operation with committees from other denominations.

2. That we approve of the National and Provincial Advisory Committee for co-operation in boys' work, and note with satisfaction the progress of the movement in this Province, and realizing the urgent need of a better understanding of the "Teen age boy problem," we urge our workers to avail themselves of the conferences and studies provided, that a more efficient leadership may be developed in this special sphere. We heartily commend the Canadian Standard Efficiency Test for boys, and urge its adoption wherever practicable. We give hearty encouragement to the movement to provide a suitable programme for "Teen age girls."

3. That we learn with satisfaction of the institute and summer-school work carried on during the year in the various districts by our Field Secretary, Rev. J. P. Westman, as an inspirational and educative factor in our work; and believing that increasing results would accrue from co-operation with other denominations in this field, we would urge that wherever possible the principle of co-operation be applied, learning that such a summer school is now planned at Ocean Park for this summer. We earnestly desire the leaders in districts thus served to give their full support.

4. That the Conference learns with approval of the measure of instruction given in the matter of temperance, and of results shown in pledge-signing, and commends this policy to all our schools. At this eventful time in the moral history of our Province, we strongly urge that our Sunday schools make the largest possible contribution to the prohibition campaign by becoming centres of intelligent enthusiasm and media through which we may reach our entire constituency and influence.

5. That the Conference notes with satisfaction the increasing interest shown in the report concerning missions as evidenced in the appointment of Missionary Secretaries and Committees and in increased contributions. We commend to all our schools the policy adopted by our General Board in co-operation with the Missionary Society and urge that libraries and equipment be procured by our
