Cause To One of Lack of Food.

A Trial Package of Stuart's Dyspepsia Tablets Sent Free.

An English medical observer claims that for one death to starvation there are seven from over-eating. His investigation is appalling and leads one to believe that among the Anglo-Saxon race over-eating is a na-

tional crime. This investigation proves over-eat ing to be the cause in ten cases out of twelve of dyspepsia, indigestion and Mrs. Dennis Delaney, Friar's Head, N.S., writes: "At the close of the year 1907, our youngest daughter, five years old, took very sick as the result of catch-ing cold. She became very weak and could not move around at all. We constomach trouble. These diseases bring on decay and

decline of the other organs, and death ensues because of an inability of the system to furnish proper nourishment to the dying and afflicted parts. When one over-eats one exhausts the gastric fluids, throws undigested food into the intestines, where it cre-

ates poison and germ life, and is finally absorbed in a putrid state or thrown from the system in a decaying

form. Stuart's Dyspepsia Tablets will over-come the ill effects of guittony and irregular eating. They will digest an abnormal amount of food and will not leave the stomach until everything has been digested. A single one-grain ingredient of

these tablets will digest 3000 grains of food, and in this proportion is seen how even gluttony can be overcome, or at least its most harmful effects re-
