MONTREAL BOND ISSUE

A. E. Ames & Co., in directing attention to the new issue of \$5,000,000 of Montreal ten-year, 5 1/2 per cent. gold bonds, to be issued about Feb. 28, for expenditure in connection with waterworks, underground conduits and other public works, say—

"Montreal is a city of first rank, being the largest in Canada and the fifth largest in America. Its magnificent harbor with ocean shipping and unexcelled railway facilities have made it an outstanding centre in world's commerce. It is estimated that 80 per cent. of the export trade of Canada goes out through this port. There are over 2,400 factories in the City, with an annual production well over half a billion dollars. It has unparalleled railway service, which is cheap and almost unlimited electrical power."

BY ORDER OF THE COMMON COUNCIL OF THE CITY OF SAINT JOHN

PUBLIC NOTICE is hereby given that a Bill will be presented for enactment at the next session of the Legislature, the object of which is to amend the "Saint John City Assessment Act, 1918" so as to provide—

(1) That instead of assessing the stock and net profits on Joint Stock Companies, Corporations or Persons established outside of the City who shall carry on business within the City or who shall have an office or place of business within the City, the Board of Assessors of Taxes shall place a tax on such Company, Corporation, Person or Persons of three quarters of one per cent. if the net profits are less than five per cent. of the gross business, and a tax of one per cent. if the net profits are more than five per cent. of the gross business.

(2) To provide that the Board of Assessors of Taxes may, if they deem it desirable, send out their Notices, Tax Bills or Accounts through the mails by post instead of having them served by the District Commissioners.

St. John, N. B., 22nd, February, 1922.

HEBERT E. WARDROPER, Common Clerk.

NOTICE IS HEREBY GIVEN that a bill will be presented to the Legislative Assembly of New Brunswick at the next session thereof to enable the Trustees of School District No. 2 in the Parish of Lancaster in the City and County of Saint John to issue debentures or certificates of debt bearing interest at a rate not exceeding six per centum per annum and not to exceed in the aggregate the sum of Twenty Thousand Dollars to retire debentures accruing due.

Dated this seventh day of February, A.D. 1922.

BARNHILL SANFORD & HARRISON, Solicitors for Applicant.

WE'RE GROWING

Optimistic Address on Future of Canada.

Past President of C. M. A. Speaks to New York Canadian Club Members—In Time Will Bid for Trade of World.

(Canadian Press)

New York, Feb. 27.—"Canada is coming to the front as an industrial country and in due time will make a bid for the trade of the world," said John S. McKinnon, past president of the Canadian Manufacturers' Association, in an address before the Canadian Club on Saturday on the industrial situation in Canada.

Agriculture, manufactures, transportation and finance were the four corners of progress, the speaker said, and Canada was not overlooking the vital consideration that continued agriculture production must be maintained as it was essential to a balanced prosperity. Canada produced half as much wheat as the U. S., although she had less than one-tenth of the population.

As a manufacturing country, Canada was making solid progress. She was today turning out manufactured goods which before the war it had been considered could not be made in Canada. The export trade of the dominion in its relation to the U. S. was such that when Canada bought from the U. S. she represented 86 per cent of the population, while what the U. S. bought from Canada represented 84 per cent of the population.

The speaker said the effect of the war upon Canada had been to check her normal increase in population by immigration. It had given a great stimulus to Canadian industry. It was the developed state of Canada's industries which enabled her to take so large and effective part in the manufacture of munitions and other necessities of war.

Canada's exports of manufactured goods represented in value \$47 a head of the population while the export of the U. S. manufactured goods represented \$60 a head of the population.

The speaker said the effect of the war upon Canada had been to check her normal increase in population by immigration. It had given a great stimulus to Canadian industry. It was the developed state of Canada's industries which enabled her to take so large and effective part in the manufacture of munitions and other necessities of war.

Canada has to export, such as grain, flour, lumber and similar articles. "Further than that," said Mr. Ewing, "I made a good many inquiries during my trip, and found that the people of the West Indies would be more than glad to trade with Canada if they could, as they have no particular love for the goods of this trade. The sugar business is depressed, but by no means down, and I visited one sugar plantation where over \$500,000 had recently been spent on the installation of new plant and machinery."

Mr. Ewing said that the sugar business is depressed, but by no means down, and I visited one sugar plantation where over \$500,000 had recently been spent on the installation of new plant and machinery.
