THE MARKETS:

Revised Every Monday for the Weekly Sun.

COUNTRY MARKET.
COUNTAI MARAEI.
About the only change to be noted is
further advance in eggs last week, due to
very small receipts. Meats, poultry an
vegetables are steady. The stock of poo
dairy butter continues much too large. It i
a great pity that more attention is not given
to the production of butter of even and ex
cellent quality, as is done where co-opera
tice dairying has been adopted. Good but
ter brings a fair price, but there is a grea
waste in the dumping of poor grades on the
market

HARVEY STATION, York Co., Jan. 29.—There is a prospect of the antinony mines at Lake George in this county being soon reopened, or rather of new mines being opened in that vicinity. Last tall W. M. B. Hammond and S. R. Adriance of Boston prospected on the farms adjacent to the lands held by the Lake George Mining company and found indices Mining company and found indica-tions of antimony in good paying quantities. They returned to Lake George last week, and if they can make satisfactory arrangements with the owners of these lands will comthe owners of these lands will com-mence work at once. As an earnest that they mean business a carload of mining apparatus and supplies ar-rived here today. Although Messrs. Hanmond and Adriance were deeply interested in the Lake George Antimony company, yet the present ven-ture is in no way connected with former operations.

SIR WILLFRID'S RABBIT POLICY

A Lakeville, N. S., letter to the West ern Chronicle (grit) says: "The rabbit factory on Main street promises to become one of the most important industries in the country. Instead of salling them, as formerly, the building has been converted into a smokeuse, where the animals are most easily and readily cured for market. And, no doubt, they will receive a ready sale at good figures in Great Britain. This is probably one of the esults of the preferential trade treaty between Canada and the mother country, secured by Canada's beloved statesman, Sir Wilfrid Laurier."

OLDEST SOUVENIR

The king of Denmark, who is thirteen months older than our Queen, is the oldest reigning sovereign in Europe. Though the Queen's senior in years, he has not reigned much more than half as long; but that is longer than all the others, including King Leopold, who only succeeded to the throne of Belgium in 1865—two years after Christian IX.'s accession. He ha been a singularly tactful and prude monarch, intensely beloved by his subjects, and carrying a weight in the counsels of Europe far greater world justify. No family is so extensively allied with the royal ho as his; the emperor of Ri grandson, the king of Greece his son, the heir to the English throne his sonin-law.-Lloyd's London Weekly.

It is estimated that North Carolina mills are consuming annually 50,000 more bales of cotton than are produced in the states.
