Address to-day the
VARIETY MF'G CO.

SHERIFF'S SALE.

There will be sold at Public Auction on Saturday, the thirtieth day of August, A. D. 1902, at twelve o'clock, noon, at Chubb's Corner (so called), in the City of Saint John, in the Province of New Brunswick, all the right, title and interest of William Chittick, in and to all that lot, piece and parcel of land described in the deed thereof to the said William Chittick from one Edward Thompson and wife as— "Situate in the Parish of Musquash, on the westerly side of the Dipper Harbor road, beginning at the big gravel hole, thence west, north and east to the said Dipper Harbor road, containing one acre, together with the buildings thereon." The same having been levied on and seized by me under our execution issued out of the Saint John County Court against the said William Chittick at the suit of James H. Gould.

Dated this twenty-second day of May, A. D. 1902,
ROBERT R. RITCHIE,
Sheriff of the City and County of St. John.

The Home

KNOWLEDGE GATHERED IN THE NEW ENGLAND COOKING-SCHOOL.

A pretty sure test of whether a cake is done is to touch it gently with the fingers. If your touch leaves a dent, the cake is not baked; if the crust springs back, it is ready to take from the oven.

When it is possible to prepare any part of a dish the day before in a leisurely way, do so. One can never guess how busy the next day may be.

Even in tomato soup, which holds neither milk nor cream, it is best to add a pinch of soda. There will surely be butter in the soup, and butter will curdle as milk does, for it contains the same properties as cream. Add the soda to the soup just before the binding of butter and flour.

Thick soup is only permissible in a dinner where there is either no meat, or a very light made-over meat dish. A thick cream soup is a substantial first course in itself.

When a recipe calls for one-half or one-quarter of a cup of butter it is much easier to measure it in a spoon than to soil a measuring-cup and then scrape out the small particles of butter. You can always know how many tablespoons are required by remembering there are sixteen table-spoonsful of butter in one cupful.

Real Boston baked beans have a flavor imparted to them by a teaspoon of dry mustard and a small onion baked in the bottom of the bean pot. The mustard is said to make beans more digestible.

Don't boil milk for coffee. Scald it. Don't put butter in your refrigerator with the wrapping on.

In stewing chicken which has been cut up, always put the roughest, most unsightly pieces in the bottom of the pot. Dark meat takes longer than white meat to cook, consequently put the white meat at the top of the pot.—Good Housekeeping.

THE SHIRT-WAISTS OF 1902.

The fashionable shirt-waist is unquestionably the white one, and both thick and thin ones are made in great variety; many kinds of madras, plain linen, sheer muslin, tucked and trimmed with lace, entreeux or with medallions of lace, and the daintiest of linen lawn embroidered by hand, dotted Swiss muslin, and so on indefinitely through an almost incredible list of materials. The plain shirt-waist of madras or heavy linen has little fullness in front; some are made with pointed yokes, some with plain yokes at the back, but the majority have no yoke at all—that is, no visible yoke. One firm of shirtmakers turn out a waist that has a yoke in front, or rather, a yoke lining, for it does not show in the shape of an outside yoke. The waists are all made to give the long-waisted line, pointed in front. The sleeves are of a moderate size in bishop shape, finished with a band at the wrist; some are tucked, but the majority are plain. There is one waist that has a small pocket at the left side that is thought very smart. It is the fad to have shirts made to order, and it is undeniable that a better fit and a smarter effect may be obtained by taking this extra trouble. And yet it would seem as though among the hundreds of ready-made waists that are displayed there were enough to choose.—Harper's Bazar.

THE SINS OF NUTRITION.

To overload the stomach with food is not less unhealthy than to deluge it with beverages; the more nutritious the food, the more hazardous are the consequences when excess is habitual. Of all the sins of nutrition, the immoderate use of meat is certainly the most grievous. It gives to the body in a form that is favorable for easy assimilation the albumen that is absolutely necessary to life, and hence the earliest effect of its excessive use must be to surcharge the body with nutrients. The chief point here is the critical examination of what is called hunger. Many persons believe that any and every sensation of hunger must be satisfied immediately;

but this is a great mistake. An equally great, if not worse, mistake is the opinion that one must eat until a sense of satiety arises. Excessive nutrition injures the mental capabilities, also. Of the particular consequences of excessive nutrition, such as hypochondria (the very name of which refers the reader to the region of the abdomen) and the gout, it is hardly necessary to speak.—German Paper.

PRETTY TABLE DECORATIONS.

One of the prettiest and newest of table decorations for a formal dinner is to have a large basket made the same shape as the table, leaving room at the edge for the plates. Fill this basket with ferns of different varieties, and have a wreath of ferns around the edge of the table, dotted with flowers in stem glasses and glass or silver candlesticks with white candles and silver-paper shades. One beautiful decoration is an immense centre basket of pink begonias and ferns, and a short distance from the centre a wreath of similar with begonias in stem glasses and candles with pink shades. Or an oblong mound filled with yellow jonquils and lilies of the valley standing upright with candles at the four corners, or candles at two corners and lilies of the valley and jonquils in cut glass vases at the other corners, makes a pretty table. Have your fruits, bonbons, salted or glazed almonds on the table in low dishes of cut glass. Red is a pretty, warm color for a dinner.—American Cultivator.

EMERGENCY HELP.

BY MISS SARAH H. HENTON.

Good housekeepers should always keep on hand a supply of simple remedies for use in case of accidents.

It is wise to have a medicine chest and place every needed remedy in it labeled so that you will know where to place your hands upon them. It will reduce your doctor's and druggist's bill, as there are many little simple home remedies which give relief.

Such things as witch hazel, arnica, balsam, vaseline, mustard leaves, linseed oil, lime water, boracic acid, pulverized borax, poultice bags, scraped linen, camphor, paregoric, all these are useful helpful remedies.

Keep a medicine chest, and a measuring glass for giving medicines. For a sore throat a gargle of salt water and powdered borax mixed half and half is excellent. Linseed oil and lime water mixed until it looks like cream is good for burns and scalds.—New York Observer.

BABIES WITH WORMS.

A Grateful Mother Tells How Her Little Boy Was Cured.

Mrs. A. Sauve, Rowanton, Que., is another happy mother who thanks Baby's Own Tablets for the health of her boy. The little fellow became the prey of worms—that curse of childhood. His rosy cheeks lost their color; his little legs and arms became skinny; his eyes lost their sparkle and he became sickly and peevish. His sleep was restless and feverish, and his food seemed to do him no good. His anxious mother almost despaired of seeing him back again to good health. However, she heard of Baby's Own Tablets, and gave them to her child, and now she says:—"The Tablets made a wonderful change in my little boy. All signs of worms have disappeared, and he is now in the best of health. I can honestly say that Baby's Own Tablets have no equal as a cure for worms."

Baby's Own Tablets are a certain cure for all the minor ailments of little ones, such as constipation, colic, sour stomach, indigestion, diarrhoea, simple fever, and the irritation accompanying the cutting of teeth. Guaranteed to contain none of the poisonous opiates found in the so-called "soothing" medicines. They are for children of all ages, and dissolved in water can be given with absolute safety to a new-born babe. Sold by druggists at 25 cents a box, or sent postpaid on receipt of price, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

CONSUMPTION

CAN BE CURED.

Consumption uninterrupted means speedy and certain death. The generous offer that is being made by Dr. Slocum, the great lung specialist. Sunshine and hope for stricken families.

Confident of the value of his discoveries, he will send free four sample bottles upon application, to any person suffering from throat, chest, lung and pulmonary affections.

For 60 Years

The name GATES' has been a warrant of par excellence in medicine.

During these six decades

GATES' ACADIAN LINIMENT

has been in public use with ever-growing popularity. All classes of workmen are now recognizing that it is the handiest and best application they can get in case of accident or colds, and the greatest pain killer in the world.

Lumbermen carry it with them in the woods for emergencies.

Fishermen and Miners have discovered that they require its aid. Farmers can get no superior liniment for ailments of horses and cattle.

Householders should keep it constantly on hand for burns, bruises, cuts, colds, coughs, etc.

It should be applied to a cut at once, as it heals and acts as a disinfectant, killing the disease germs which enter the wound. If you have a cold or other use for a liniment, get a bottle at once and you will be convinced that you have got the best. Sold everywhere at 25 cents.
