

(d) To evolve a just and equitable relationship between the prices of raw materials, primary commodities, manufactured and semi-manufactured goods exported by developing countries and the prices of raw materials, primary commodities, food, manufactured and semi-manufactured goods and capital equipment imported by them, and to work for a link between the prices of exports of developing countries and the prices of their imports from developed countries;

(e) To take measures to reverse the continued trend of stagnation or decline in the real price of several commodities exported by developing countries, despite a general rise in commodity prices, resulting in a decline in the export earnings of these developing countries;

(f) To take measures to expand the markets for natural products in relation to synthetics, taking into account the interests of the developing countries, and to utilize fully the ecological advantages of these products;

(g) To take measures to promote the processing of raw materials in the producer developing countries.

## 2. Food

All efforts should be made:

(a) To take full account of specific problems of developing countries, particularly in times of food shortages, in the international efforts connected with the food problem;

(b) To take into account that, owing to lack of means, some developing countries have vast potentialities of unexploited or underexploited land which, if reclaimed and put into practical use, would contribute considerably to the solution of the food crisis;

(c) By the international community to undertake concrete and speedy measures with a view to arresting desertification, salination and damage by locusts or any other similar phenomenon involving several developing countries, particularly in Africa, and gravely affecting the agricultural production capacity of these countries, and also to assist the developing countries affected by this phenomenon to develop the affected zones with a view to contributing to the solution of their food problems;

(d) To refrain from damaging or deteriorating natural resources and food resources, especially those derived from the sea, by preventing pollution and taking appropriate steps to protect and reconstitute those resources;

(e) By developed countries, in evolving their policies relating to production, stocks, imports and exports of food, to take full account of the interests of:
