ILLUSTRATIONS.

Photographs.

Plate I.	Lower part of the second falls on the Namewaminikan river..	Frontispiece.
" II.	Banded jasper on the iron range east of Poplar Lodge..	44
" III.	Sheared Huronian conglomerate on the south shore of Paint lake..	58
" IV.	Contact between overlying diabase and underlying Keewenawan sediments at Red Rock..	58
" V.	Island at Split Rock portage, Nipigon river..	70
" VI.	Columnar diabase chills on the lower part of Pijitawabik bay..	80
" VII.	Diabase pinnacle near south end of Herrick lake..	80
" VIII.	Chisel Rock: columnar diabase, east shore of Pijitawabik bay..	94
" IX.	Dry valley across Keewatin schists, east of Black lake..	96
" X.	Roches moutonnées at Cache island..	110
" XI.	Diabase boulder, east shore of Pijitawabik bay, Lake Nipigon..	144
" XII.	Falls on the Black river, three miles below Macinakago lake..	114
" XIII.	Falls below the head of the portage at Camp Alexander, Nipigon river..	140
" XIV.	Falls above Cameron pool, Nipigon river..	140
" XV.	Split Rock island, below the portage, Nipigon river..	144
" XVI.	Virgin falls, Nipigon river..	144

Drawings.

Fig. 1.	Sketch plan of Lake Nipigon basin..	21
" 2.	Section on Spruce river, ten miles southwest of Black Sturgeon lake..	82
" 3.	Section at Red Rock, mouth of Nipigon river..	86
" 4.	Diagrammatic section near the extremity of the point between Big Trout and Pigeon bays..	90

Map.

No. 1090, Geological map of Lake Nipigon.
