

In the case of Societies decided by the "Court" to be "College" societies the control must be delegated by the "Court" to the College to which they belong.

It is extremely desirable that there should be a uniform system of discipline throughout the whole University, and that the Court should be limited in numbers and yet contain a member of each of the divisions, in order to secure the cohesion of the University.

"College" Societies not infrequently become "University" societies, and the decisions as to whether this has taken place or not should rest with this central authority.

II. A more exact definition of the distinction between University and College offences than now exists.

The new University Act should define the distinction between University and College offences. We have experienced great difficulty in making any distinction in the case of University College, which uses the same building as the University, at the same time.

A similar difficulty arises in the case of the Medical Faculty. The difficulty of distinguishing between University and College administration is also greatly felt in such questions as the control of the buildings and grounds, the admission of outside lecturers, the allotment of rooms, the preparation of the estimates for the year, the compilation of the Calendar and the control of the College Residence

III. The establishment of a new Council, consisting of the joint Professoriates of both University and Colleges.

1. To exercise the functions of the Senate Committee on applications and memorials.

2. To fix the time-table of lectures.

3. To undertake the revision of the curriculum in Arts subject to the assent of the Senate, this revision to be undertaken in conjunction with representatives of the High Schools on the Senate, representatives of the School of Science and of the Education Department, together with the Heads of all affiliated institutions concerned in the Arts curriculum.

It has been found necessary in the past to have meetings of the joint Professoriates in order to arrange the time-table and to undertake the revision of the curriculum, and we think this body should have a statutory existence. It is suggested that to these functions should be added those of the Senate Committee on Applications and Memorials as defined in the statute, viz:—

"All petitions and memorials relating to attendance at lectures and examinations or academic standing shall be laid . . . before the Committee, which shall report to the Senate, with recommendations in each case."

IV. The formation of the Medical Faculty into an independent Collegiate body, with powers of discipline and administration similar to those of the several Colleges of the University.

The advisability of this is evident from the fact that in the present University Council the number of the Medical exceeds that of the Arts Professors, and also that matters affecting the Medical Faculty are necessarily distinct from those of the Arts Faculty.

V. A better representation of the several departments of the University and of the College and Medical Faculty on the Senate.
