### Clean Skimming Means Good Living

The hog trough is no place to put butter.

Wide awake farmers want the cream separator that skims the cleanest. It means more profit—better living. That separator is the Sharples Dairy Tubular—the separator that's different.

Sharples Dairy Tubulars have twice the skimming force of any other

separators—skim twice as clean.

Prof. J. L. Thomas, instructor in dairying at the agricultural college of one of the greatest states in the Union, says: "I have just completed a test of your separator. The skimming is the closest I have ever seen—just a trace of fat. I believe the loss to be no greater than one thousandth of one per cent."

That is one reason why you should insist upon having the Tubular. Tubulars are different, in every way, from other separators, and every difference is to your advantage. Write for catalog \$1.00 and valuable free book, "Business Dairying."

# WHY WAIT TILL SPRING

### Why Waste Cream and Butter all the Winter?

We say and can prove that the Melotte will pay for itself in increased cream and butter yield alone (at least 20%) before spring comes, to say nothing of improved quality of warm and sweet skim milk for calves and pigs, and the saving in time, labor, space and utensils.

Why not allow us to send you a Melotte on free trial, and let the machine speak for itself? If you have less milk now, remember it is more valuable, as butter is making better prices, and 20% more cream and butter every week is surely well worth saving.

The universal advice of Melotte users to friends and neighbors is

### Be Sure and Get a "Melotte"

This is why the Melotte has to-day by far the largest sale in Canada.

Why not allow us to send you a Melotte on trial? State the number of cows and we will tell you the best size to try. There is no risk, no trouble, no expense to you, and cash or credit terms can be arranged.

We ask again: Why wait? Why not commence getting that extra butter yield at once? It is yours for the asking. Write to-day for illustrated catalogue.
