Engineering

The engineer's forte is versatility of professional knowledge. The electrical engineer must know something of steam, the surveying engineer must know something of electricity, and so on. To acquire knowledge, experience is, of course, necessary. But you cannot possibly get all the experience you would like. You must benefit by the experience of others. That is where your technical journal and your library help you.

The "Canadian Engineer" is **THE** journal of engineering in Canada. It is a monthly engineering publication of 84 pages, and is published at the corner of Church and Court Streets, Toronto.

The following articles, amongst others, appear in the May number, now ready:

Large European Gas Engines.
By Frank C. Perkins.

By Frank C. Perkins,
What is an Engineer Con-
structor.

structor.
The Electrification of Steam
Railroads.

Railroads.
The Westmount Destructor
Plant.

Book Reviews.

The proprietors of the "Can-

The proprietors of the "Canadian Engineer" also publish a weekly edition which gives all the news the profession desires. By reading these papers you are kept in touch with all the developments in your profession. There are no waste lines of reading matter. The "Canadian Engineer" is a business paper, catering for busy men. It wastes none of your time, but it gives news and information which you cannot afford to miss.

The latest weekly edition contains, amongst other features, the following:

Industrial News.
Notes of Markets.

Projected Construction Work.
Subscription Rates: Monthly
