

WINDSOR DAIRY SALT

Every farmer's daughter and
every farmer's wife knows

They all use it—for making delicious butter for their own table. They found out years ago that Windsor Butter Salt dissolves quicker, works in easier, and helps butter to keep better.

Windsor Salt is absolutely pure and every grain is a perfect crystal. 42

If you want to get "top" prices for your butter, use Windsor Butter Salt.

Trinidad Lake Asphalt

has no equal as a waterproofer. After we have used it for thirty years, everybody is learning its value for every waterproofing purpose.

Genasco Ready Roofing

is made of genuine Trinidad Lake asphalt.

There is no roofing substitute for Genasco—none will last so long.

Ask your dealer for Genasco. Mineral or smooth surface. Look for the hemisphere trade mark. That's a surer guide than the looks of the roofing. It is your real guarantee, but we'll write you a guarantee, if you think you need it. Write for the Good Roof Guide Book and samples.

THE BARBER ASPHALT PAVING COMPANY

Largest producers of asphalt, and largest manufacturers of ready-roofing in the world.

Our great illustrated book on the Telephone sent Free to anyone writing us about any new Telephone lines or systems being talked of or organized.

We have a splendid money-making proposition for good agents.

The Dominion Telephone Mfg Co., Ltd. Dept. Q. Waterford, Ont., Canada.

Generally speaking, there are two methods in use for the filtration of public water supplies. They are known as the "Slow Sand" filtration and "Mechanical" filtration. In the former type, the water filters through beds of sand and gravel at varying rates of from two to five million gallons per acre every twenty-four hours, according to the character of the water. In mechanical filtration, a precipitate is first added to the water, which is then passed through a medium of sand under pressure, the rate of filtration being many times more than in the slow sand filters.

The type of filter best suited for any particular water must be carefully considered before adoption by a municipality, and this can only be done by a competent sanitary engineer. When either system can be used, it resolves itself into a question of primary cost and annual maintenance. The slow sand filters cost, approximately, \$30,000 per million gallons of the daily consumption and about ten per cent. of this per annum for operating; while a mechanical filter costs about one-fourth, and, if carefully operated, a high degree of efficiency as regards purification can be obtained. This is well exemplified at Chatham, Ontario, where for some years filters of this latter class have been in operation, the water treated being that of the river Thames.—*Commission of Conservation Bulletin.*

GET YOUR NEIGHBORS' CASH

After reading THE FARMER'S ADVOCATE for a year or more you will agree that every farmer should arrange to have this practical journal arrive every week. Now, when "Tag: or the Chien Boule Dog," a bright serial, is being used is a good time to talk to your neighbors about becoming regular subscribers. Copies from September 14, when the story began, can be provided to new subscribers.

By way of showing our appreciation to those who take an interest in THE FARMER'S ADVOCATE in this way we advance the date on the label six months for every new name sent in accompanied by \$1.50. Besides many valuable premiums are offered to those who assist in swelling our subscription lists.

AGRICULTURAL PROGRESS OF THE ARGENTINE REPUBLIC

In these days of quick communication and complete transportation systems between the four corners of the earth, the people of any country dependent on outside markets for the disposal of a surplus of products, should study as carefully as possible every source of competition, both present and prospective. It is necessary to do so in order to decide as to the particular products in which the competition is likely to be most keenly felt.

In this connection, the development of the Argentine Republic, the enormous increase in its exports of wheat and animal products, and the rapid growth of its population, should be matters of much interest to Canadian farmers.

The interest is increased by the similarity of large areas of the country in its physical features and adaptability for the production of certain crops to our own Northwest. The country, as a whole, differs in point of climate from Canada, with a range of temperature that gives it a tropical character in the north, varying to sub-arctic in the south; but the great central, treeless plateau (the pampas), with its large estancias (ranches), devoted largely to live stock and wheat-growing, has many features in common with the Canadian prairie provinces.

It is undoubtedly a country of enormous possibilities in many directions, but the tendency at present is to push the growing of wheat and beef cattle. Hog-raising has made little or no progress, probably owing to the fact that the Argentine is not pork-eater. He breakfasts on rolls and coffee, like the Spaniard and Italian in other parts of the world.

The Argentine has great possibilities

THE

Workingman's Warmest Friend

IS THE

SHEEP LINED COAT

Made of Duck, Corduroy, Frieze, Whipcord and Etoff. No small pieces used for lining. All skins are selected and thoroughly cleaned. Seams are all **DOUBLE STITCHED.**
