RS'MEET G

ON January the 5th the Committee of the Manitolia Grain Growers' Association met with the Manitolia Government to discuss the principle upon which the Government should provide publicaly-owned elevators. The Government, two weeks ago, accepted the principle and asked the Grain Growers to present their scheme, which was done, and they will take it up and place a bill containing it upon the Statute books at the session of the legislature which will be held next month. The conference lasted all the formoon, and at the conclusion the Government promised to give the matter their earnest and careful consideration, in the very mear future. This is how the matter stands at the present time. The Grain Growers have prepared a memorandum of the principles upon which they deemed the publically-owned system should be provided. Copies of this memorandum were presented to the Government and were published in the daily papers of Winnipeg on the same day.

The members of the Government present at the conference were: Premier Roblin, Hon. Robert Rogers, Hon. G. R. Coldwell, Hom. J. H. Howden and Hon. Hugh Armstrong.

The Grain Growers' committee comprised D. W. McCuaig, J. W. Scallion, R. C. Henders, R. McKenzie, G. H. Malcolm, Peter Wright, J. S. Woods, F. W. Kerr, R. J. Avison, R. M. Wilson, who are all members of the Board of Directors of the Manutoba Grain Growers' Association. In addition the other members of the commuttee were: T. A. Creerar, president, of the Grain Growers' Grain Co.z also D. D. McArthur, former director of the Association, R. A. Bonnar, the legal advisor for the Grain Growers' Grain Growers' also D. D. McArthur, former director of the Association, R. A. Bonnar, the legal advisor for the Grain Growers' Grain Growers' also D. D. McArthur, former director of the Association, R. A. Bonnar, the legal advisor for the Grain Growers' Grain Growers' also D. D. McArthur, former director of the memorandum presented to the January the 5th the Committee of the Manitoba Grain Gropers' Association met with the Manitoba

GRAIN GROWERS' MEMORANDUM

The memorandum presented to the Government by the Grain Growers was as follows:

Financial Provisions

Government by the Grain Growers was as follows:

Financial Provisions

The Provincial Government would assume the responsibility of providing for the financial requirements in respect to purchasing the existing elevators or erecting new ones, or both.

It is not intended that the Government should provide, by the credit of the province, for any expensiture in connection with the operation or maintenance. The Government would issue debentures payable, say, in forty years. This would not be too long a period, since there is no doubt that the undertaking would be permanent, and especially since the grain handled is intended not only to bear the cost of maintenance and operating expenses, but to provide a sinking fund as well, to care for debentures at maturity.

The revenue received through the operation of the elevators would be based on what would be sufficient to meet ordinary operating expenses, interest on debentures and provision for maintenance, for sinking fund, or for both. Since the traffic is eventually intended to pay the initial outlay, the elevators would, as a matter of course, be exempt from taxation.

It has been estimated that three millions of dollars would provide new storage sufficient for the present requirements of the province. If the existing elevators were all purchased, on the basis of their actual value today, considerably less than two-thirds of that amount would be required. An additional sum for re-construction would be necessary. When legislation is passed, creating the system, debentures or bonds would be authorized by the legislature on the credit of the province to that extent, i.e., ex.900,000.00, and supplied as requirements would demand.

The Revenue

The revenue would come from a charge of one and three-quarter cents for receiving, cleaning and storing wheat, one cent for oats, one and one-half cents for barley and two cents for flax, for first fifteen days, with an additional storage charge thereafter of one-thirtieth cent per bushel per day. Under these charges the commissi

Scheme outlined by Committee now in hands of Cabinet

insurance costs. Other sources of revenue might be available.

The sinking fund greated to pay off the indebtedness would be treated strictly as a sinking fund, and not as ordinary revenue. For new elevators required from year to year, such yearly appropriations would be made as would permit of their construction when found necessary.

Eletator Commission

The commission would consist of three members, to be named by Board of Directors of the Manitoba Grain Growers' Association, and appointed by the Government.

Their term of office would be for life,

(b) Where complaint supported by a statutory declaration is made to the executive of the Grain Growers' Association which such executive is unable to adjust with the commission direct, the executive to submit same to the Court of Appeal of the province, or three members thereof, with power to such court to dismiss a member or members of the commission, if sufficient cause be deemed to be shown for such dismissal.

Auditor and Auditing

Auditor and Auditing

All accounting and book-keeping of the commission, both at head office and initial points, would be subject to the examination and report of the provincial

the first duty of the commission would be to secure a valuation of the existing elevators within the province. (If the existing elevators were secured, the commission would, as rapidly as convenient, re-arrange them to meet the requirements of the new system, having in view always economical management, the idea being that all grain shipped by individual farmers would be special binned.) In respect to valuation, the purpose would be to arrive at, as near as possible, the actual business worth of these elevators at the present time as a public utility. In arriving at this, the following factors would have to be taken into consideration.

(a) Depreciation in value since date of erection. the first duty of the comm

(a) Depreciation in value since date of erection.

(b) Volume of business handled, or value as a going business concern. (Many elevators are worth nothing more than their depreciated value, less cost of removing and re-erecting them in a manner suitable to the needs of the saytem.)

(c) Adaptalitity to requirements of a public system. (In this would enter the facilities of elevators, as far as special binning, cleaning and rapid handling was concerned.)

(d) Condition of building, foundation, machinery, etc.

achinery, etc.

(e) Hates of insurance and cost of peration.

(e) Rates of insurance and conoperation.

Upon this basis an exact estimate of
each individual elevator could be secured
with comparatively little cost, and an
offer made to purchase upon this basis.

If the existing owners refuse to sell at
the valuation thus arrived at, the commission would proceed to the erection
of a new system as rapidly as could
conveniently be done. This new stysem
would be uniform in respect to style
of construction, machinery, method of
operation, etc.

of construction, machinery, method of operation, etc.

g. It would also be the duty of the commission, when they were securing a valuation of the existing elevators to secure an estimate of the cost of a new system of elevators suitable to the end for which it would be created. Data could be collected molicating the amount of grain tributary to the different shipping points in the province. The cost of erecting a new system would also be an aid in arriving at a correct valuation of the existing ones. In arranging the elevators, provision could be made with a particular view to special binning. Official Samples and Weights

The operator in charge of each elevator.

a particular view to special binning. Official Samples and Weights
The operator in charge of each elevator shall preserve official samples of all grain delivered to the elevator. This would be to by taking a sample from each load drivered, after it was cleaned, and putting the property of the property

merchant who was entrusted with the selling of it.

Intending purchasers would visit this sample room, select the samples that suited them, and purchase from the commission merchant who had the hand, ling of it. if a price satisfactory to thowner could be secured. This purchasere representing the domestic or foreign miller, would have the guarantee of the commission that the grain back in the Commissioners' elevator, represented by the sample he had seen, would be delivered to him without being in any way mixed with other grain. This guarantee of the preservation of the identity of grain would form the basis for a sample market.

The grain, when shipped, would be graded by the inspector, as at the present time and the grade affixed. If, however, it had been sold on sample, the purchaser Continued on page 30

THE GRAIN GROWERS' REQUESTS

That the Government shall provide storage elevators at each shipping point in the province, the expenditure to be met from the grain passing through these elevators.

That an offer be made to purchase existing elevators upon a fair reluation of their actual worth, or at an estimate at which they could be duplicated under the new aystem.

That the elevators be under the absolute control of a commission of three competent men, who should be nominated by the Manitolsa Grain Growers' Association, and appointed for life by the Government. This commission to be beyond the reach of any party influence, and to be perfectly independent, subject only to a vote of the legislature or a hearing before the Court of Appeal.

That all employees of the new elevator system be engaged by and responsible only to the commission.

That elevator operators take careful samples of all grain stored in their elevator, and also weights of such grain.

That the identity of the grain be preserved from the farm to the market.

market.

That the head office of the commission be in Winnipeg, where a sample market could be maintained in the interests of the producers, as well as the millers.

7,550,000,000,000,000,000,000,000

consistent with efficient administration

consistent with efficient administration and good conduct.

In the event of a dismissal, as hereinafter provided, or in the event of the resignation or death of any or all of the commissioners, the appointments to fill the vacant 'positions would be made in the same way as the original appointment was made, i.e., named by the

auditor. The provincial auditor would not be required to vouch for disburse-ments before they had been made. His duty would be to examine the whole financial business of the commission, and present at the end of each year for the consideration of the legislature, report and financial statement indepen-dent of the regular public accounts,
