1 To 1 To 1

many four years ago, and now, Mr. Shyder says, many of the millions which abound in his ponds weigh from 15 to 17-pounds each. It seems odd, yet he says it is true, that you may easily see these fish by laking a little soaked wheat to the side of the pond and giving three loud whistles. The fish will rush to the shore in waves and so throw the water with their tails that to keep dry you must keep a distance from the side of the pend and giving three loud whistles. The fish will be seen the water with their tails that to keep dry you must keep a distance from the side of the pend and giving three loud whistles. The fish will be seen when the application for the release of Burress McLuckie, of Homestead, was led up. After listening to the testimony and argument Jadge Magee fixed the amount of Burgess McLuckie's bail at the presented Mr. Snyder with a few for trial, and he finds them equal in flavor to any of our best Cânadian fish. Mr. Snyder now intends putting up a pond of his own, and many other farmers might add to the value of ther farms by doing likewise.

Wenders of a Kalelelescope.

The following curious and interesting calculation has been made on the number of changes that can be made in the picture presented in that remarkable instrument, the kaleldescope.

Supposing the instrument to contain but twenty small pieces of colored glass and that you make ten changes each minute, at that trate it would take the inconceivable number of effects of the content of the content of the portion of such immense number of changes that can be produced 1 Verily, the human and shrinks from the contemplation of such immense numbers of changes that we he produced 1 Verily, the human and shrinks from the contemplation of such immense numbers of changes that we he produced 1 Verily, the human and shrinks from the contemplation of such immense numbers of changes that we he produced 1 Verily, the human and shrinks from the contemplation of such immense numbers of changes that can be produced 1 Verily, the human and shrinks fr

of 462,980,888,576 years and 300 days through the immense number of changes that can be produced! Verily, the human anid shrinks from the contemplation of such immense numbers. We have no more of an idea of what such a length of time means than we have of the meaning of the

A Montreal despatch says: A beast in human form was brought before the recorder to-day and charged with inhuman conduct at home. Labrie was his name. He had been living with a woman for the past two years and the couple had a child are old and another aged 3 days. Yestermy the monster came home, saized the man, the little thing at its mother's head, following up this set by a desperate attack upon the 2-year-old. There would, in fact, have been murder had not the police intervened, and to-day Judge De Montigny expressed regret that he could not send the scoundrel to St. Vincent de Paul for seven years. Labrie, however, got 16 months in the common jail with hard labor and all present said that it served him right.

A countryman tells this pretty tail story in the Cincinnati Times-Star: "When in the city we do not act half so idiotic as city-folks do on a farm. Why, do you know, last summer a student from the Cincinnati University visited me. University visited my farm, and one day when I started to get some young potatoes took the basket from my hand and said be'd get then. Half an hour 'later he came back with an empty basket, saying that he had hunted all over the patch and could find nothing but blossoms. There was not a single potato on the vines. I thought he would drop dead when I took the hoe and began digging them out of the ground. He said he thought they grew on top of the vines."

The stillers are anxiously waiting to see what will be done to morrow, when the date for the old men to return expires.

Bestocians the Browned.

Prof. Labonde a simple method of restoring life in persons apparently drowned has been recently test in France with signal success.

The other day at a watering place in Normandy two bathers, a young man and a boy, who were unable to swim, went out of their depth and disappeared. They were brought on shore inanimate, and were taken to the village. Two doctors were sent for, but the young man gave no sign of life, and they declared he was dead. M. Labonde, we was fishing at half-an-hour's distance, came up as soon as he heard of the accident. He examined the body, and found that the extremities were cold and the heart had stopped. Then taking hald of the root of the tremities were cold and the heart had stopped. Then taking hald of the root of the tremities were cold and the heart had stopped. The ship did not sink, nor was any one lost, but forever after the thick-set man and the elderly female seemed to have a better understanding of each other.—Detroit Tobacco and the Teeth.

It causes the teeth to turn yellow and decay, and the gums to grow soft and spongy until even the sound teeth often drop out.

Dr. John Allen, the father of dentistry in New York, says it is almost impossible to fit false teeth closely in the mouth of a tobacco user, because of the flabbiness of the gums.

Eminent surgeons testify that the most terrible cases of cancer of the lips, tongue and stomach, are often occasioned by

terrible cases of cancer of the lips, tongue and stomach, are often occasioned by smoking.

Senator Hill, one of the most eminent

smoking.

Senator Hill, one of the most eminent men of the South, United States Senator from Georgia, died in 1883, of cancer of the tongue caused by smoking, and ex-Mayor Samuel Powell, of Brooklyn, died of cancer of the month from the same cause.

General Grant, the world renowned soldier, who was President of the United States for two terms fell a victim to cancer of the throat, caused by smoking.

The nee of tobacco almost always stunts a boy's growth and makes, him puny, weak and cowardly. No boy who smokes or chews can expect to grow to be a strong upright man.—Ex.

She Handles Lots of Coin.

Miss Calhoun, one of the most expert money handlers in the Treasury Department at Washington, has the remarkable record of counting 85,000 coins in a single day, each coin passing through her hands, and so delicate has her sense of touch become that should there be a counterfeit coin in the lot she would detect it even when counting at this tremendous rate. She spreadathe coins upon a large glass-top deak and draws them off with the tips of her fingers, one, two, three or four at a time, as she pleases, for her four fingers are equally educated in the work. Her eyes have nothing to do in the feeling of it and the amount of resistance upon the glass desk that a piece of spurious gold, silver, nickel or copper money attracts her attention instantly.
