

HASZARD'S GAZETTE

Friday, February 22, 1856.

The BRITISH MAIL arrived last night, (Thursday,) at 8 o'clock, with news to the 2d February. Parliament had been opened by the Queen in person. By telegraph to *Wilmer's Times*, we learn, that the Protocol for Peace was actually signed. We shall be kept in suspense for some time yet, while the plenipotentiaries are sitting.

NEWS BY THE ENGLISH MAIL.

SIGNATURE OF THE PEACE PROTOCOL.

Yesterday at noon a protocol recording the acceptance of the Austrian proposals as a basis of peace, was signed at Vienna by the Ministers of Russia, France, England, Austria and Turkey.

THE PEACE NEGOCIATION.

BERLIN, Thursday, Jan. 31.—Count Esterhazy, the Austrian ambassador, has communicated to the Prussian cabinet the draft of the proposal which Austria intends to make to the German Diet, with a view to obtain the adhesion of the Germanic confederation to the preliminaries which have been accepted by Russia. The Saxon premier, M. de Boust, has arrived here.

AN ARMISTICE.

The *Morning Post* says.—We have reason to believe that an armistice will shortly be concluded for a limited period. The exact terms of the armistice have yet to be defined. It may very probably be confined to land operations, as there is no possibility of any collision at sea, and the continuance of the blockade, supposing peace not to be concluded by the time the Baltic is free from ice, would be necessary to our position, as negotiators, and in conformity with general precedent.

RUSSIA AND THE ALAND ISLANDS.

The *Times* Paris correspondent states his belief that Russia has agreed not to re-fortify the Aland Islands. It is said it is probable that Prussia will be admitted to the Conference, only on condition of accepting the propositions adopted by the allies.

FRANCE.

The Queen's speech was published in Paris early yesterday afternoon, and produced a very favourable effect. It is considered moderate and dignified.

TURKEY.

Official despatches from Constantinople state that warlike preparations are carried on with the utmost activity. Omar Pacha's suggestions have been approved.

SWEDEN.

At Stockholm it is officially stated that active preparations for war are being continued. Sweden will be prepared for offensive operations, if necessary.

THREATENED ATTACK ON KERTCH.

On the 9th of January the Russians made an advance upon the ice, with the intention of attacking Kertch, but the vigilance of General Vivian completely disconcerted the enemy.

PREPARATIONS FOR TROOPS AT SHUMLA.

A Trieste despatch, dated the 30th inst., says that news received there from Constantinople announces that, notwithstanding the intelligence relative to peace, General Shirley had sent orders to Shumla to prepare quarters for troops for that place. These troops were to proceed to Shumla in the spring.

Carriage Bolts.

HASZARD & OWEN have received a large stock of the above of the following sizes:—

LENGTH.	DIAMETER.
1 1/2 inches by 1/2	5-16 3-8
2 "	5-16 3-8

H. HASZARD.

Charlottetown, Nov. 1st, 1855.

CHEAP AND SAFE LIGHT!

NEWELL'S PATENT

Safety Lamp & Lamp Feeder

Warranted to prevent all accidents from the use of BURNING FLUID, PATENT OIL, ROSIN OIL, CAMPHENE,

And all other explosive compounds used for production of light.

This INVENTION is applied to common Fluid, Solar and Camphene Lamps, Lamp Feeders, Fluid-holders, Lanterns, &c. &c.

We respectfully invite the attention of the public to NEWELL'S IMPROVED SOLAR FLUID LAMP! which gives a steady, brilliant flame, nearest to Gas that has ever been produced. The cost of burning being only ONE CENT AN HOUR! These Lamps are particularly adapted for Churches, Hotels, Factories, Stores and parlours. Oil Lamps can be altered, using the same shade. Common Fluid Lamps can be changed to Safety Fluid Lamps.

PORTER'S

Patent Burning Fluid and Camphene,

As cheap and good as can be bought in the market. Also, Shades, Globes, Lamp Wickings, Entry Hall Lanterns, Fluid Chandeliers, &c., &c.

For Sale, Wholesale & Retail, by

Newell, Willard & Co., No. 28 Bromfield Street, Boston.

N. B.—A large deduction will be made from the former prices of NEWELL'S SAFETY LAMPS, &c. The following certificates are a sufficient guarantee of the entire safety and efficiency of the Safety Lamp and Feeder.

We have had an opportunity to test the Patent Safety Lamp and Lamp Feeder of Mr. John Newell, of this city, in regard to the measure of protection their construction affords. In the trials to which we subjected them, we endeavored, without effect, to produce explosions of the vapor of the fluid mixed with air, and to burst them by the pressure of the vapor alone. The principle adopted by Mr. Newell is that of the well known Davy Lamp. He has so combined the parts, that we are satisfied that all risk of explosive action is removed. CHARLES T. JACKSON, M. D., AUG. A. HAYES, M. D., Assayers to the State of Massachusetts.

BOSTON, Aug 30, 1855.

Mr. John Newell, of Boston, has exhibited to me a Lamp, and also containing vessels, furnished with wire gauze protectors, upon the principle of Davy's Safety Lamp for miners. He has used both these instruments before me with inflammable fluids, and in both, when set on fire, the flame was arrested by the wire gauze, which is coated with silver. If the instruments are faithfully constructed, and carefully attended to, so that the wire gauze does not suffer injury from corrosion, wear or violence, I am of opinion that the protection will prove effectual against explosion. Nothing short of this conviction would induce me to commend the continued use of the burning fluids, so called, as I have thought they ought to be entirely discarded, if not prohibited from use; so frequent and dreadful are the accidents occasioned by ignorance and carelessness. In every case, glass lamps should be given up; and those of metal substituted, on account of the danger of fracture. B. SILLMAN, senior.

NEW HAVEN, Oct. 16, 1855.

I have examined Newell's Patent Safety Lamp and Lamp Feeder. They are constructed upon strictly philosophical principles, having a tube of silvered wire gauze, with a small perforation in the cap. If well made, they cannot fail to insure protection against these dangerous explosions to which the vapors of burning fluids and camphene are subject, when mixed with air. Their general introduction, I have no doubt, would prevent many distressing and fatal accidents.

E. S. CARR, M. D., Professor of Chemistry, Albany Medical College, and of Applied Chemistry in the University of Albany.

BEER & SON, T. DEXTER & CO., and W. B. DAWSON are our authorized Agents for the sale of the above in P. E. Island. Dec. 13, 55.
