

from the kind welcome His Lordship generally received, during his stay on the island; and we humbly pray that the Divine blessing may follow the unwearied exertions of Dr. Binney, who is so eminently endowed with abilities for discharging the weighty responsibilities of a Bishop in the Church of God.

THE BELFAST TEACHERS' INSTITUTE.

The annual Meeting of this Institute was held at Pinetoe, on Saturday, the 27th ultimo.

In the absence of the Chairman it was moved and seconded that Mr. J. Morrison take the chair.

It was ordered that all books now out, belonging to the Institute, be returned on or before the last Saturday in August, for the purpose of ascertaining the state of the Library, to which the Secretary made an addition by the presentation of the "Massachusetts Teacher" for the year 1857, and received the thanks of the Institute.

Those present who had not previously signed the constitution, signed it, on motion to that effect.

Extracts from the "Massachusetts Teacher" were read, showing the zeal and activity of the Teachers of Massachusetts, in forming institutes and associations, and in holding meetings for the discussion of matters pertaining to their profession, for lectures from the more experienced and efficient of their own number, as well as from members of the other Hierarchical professions, and for exercises in various branches of the higher walks of learning, conducted by competent instructors.

It appeared from these extracts that gentlemen of the highest educational ability in the State, were Secretaries of Boards of Education, Superintendents of Schools, Principals of Colleges and Academies, &c., take an active part in these meetings, thereby investing them with such an interest that they are not only attended, but are required to accommodate the large audiences who attend from among the people.

The following is a part of an address by the President of the Massachusetts Teachers' Association, at the opening of the last annual meeting in November last:

"As the profession of teaching advances in respectability and pecuniary value, so do our personal obligations and duties to that profession augment. It is not enough that each Teacher should faithfully perform his daily task in the School-room. He owes something to the fraternity of Teachers—something to the *corps de corps*. No Teacher, good or bad, has a right to shut himself up in his own little domain, cut off from sympathy with other Teachers, imparting no light to those receiving none from them. If a wise Teacher, he is morally bound to dispense his wisdom to others, if he is unable, to receive wisdom from others. Hence we believe that the duty of each Teacher is to do something to the fraternity of Teachers—something to the *corps de corps*. No Teacher, good or bad, has a right to shut himself up in his own little domain, cut off from sympathy with other Teachers, imparting no light to those receiving none from them. If a wise Teacher, he is morally bound to dispense his wisdom to others, if he is unable, to receive wisdom from others. Hence we believe that the duty of each Teacher is to do something to the fraternity of Teachers—something to the *corps de corps*.

"We would that every educator in the land had his name enrolled with us; that our numbers, instead of being reckoned by hundreds were read in thousands; that our influence, instead of being confined to a few States, were felt in every part of the Republic. We would that every educator in the land had his name enrolled with us; that our numbers, instead of being reckoned by hundreds were read in thousands; that our influence, instead of being confined to a few States, were felt in every part of the Republic.

A large amount of information beneficial to Teachers may be gained from the pages of the *Massachusetts Teacher*, and every member of the Institute is strongly recommended to become a subscriber to it. It is published on the first of every month, and contains a great deal of interesting and valuable information. It is published on the first of every month, and contains a great deal of interesting and valuable information.

The Committee appointed to visit the following Schools were: Mr. J. Dixon and Mr. J. Morrison to visit Buchanan and Point Prim Schools, on Friday, July 24; Mr. Kenneth McKinnis, (Bookkeeper), to visit the Lower Newtown and North Plains Schools, on Saturday, July 25; Mr. Hector Campbell and Mr. William McNeill to visit Port George and North Plains Schools, on Saturday, July 25th. The schools not visited during the present month, to be visited next month.

It was also moved, seconded, and carried unanimously, that, at future meetings, when Reports of Schools shall be submitted, any teacher presenting evidence respecting a particular school, shall be permitted to propose questions to the teacher of said school, which the last-mentioned teacher shall be bound to answer, in so far as it may be conducive to the further improvement of that school.

Next meeting to be held at the Lower Newtown School-house, on the last Saturday in July, at 4 o'clock, p. m. W. McNEILL, Secretary. Lower Newtown, July 15, 1857.

Tickets—for gentlemen, 50¢; for ladies, 10¢. To be had at the tables. July 15, 1857. 8

NEWS ITEMS.

COMPLETION OF THE ATLANTIC TELEGRAPH. The completion of 1250 miles (one-half) of the cable for the submarine Atlantic telegraph, by Messrs. Newall & Co., was celebrated on Wednesday, the 10th instant, at their works, Birkhead, by a dinner given to their workmen with their families. Messrs. Newall's contract has been executed with great speed and punctuality. On the 19th November last they tendered either for half or the whole of the cable, to be finished on 30th of June. The tender for the half was accepted in the December following, and Messrs. Newall, who had taken one of the transit sheds attached to the Birkhead docks, at once set to work to provide the necessary machinery, all of which had to be made for the occasion. The wire was supplied by Messrs. Newall by their own wire-drawers, Messrs. R. Johnson & Co., of Manchester, who completed their task by the 1st June. Messrs. Newall commenced spinning the cable on the 15th February, and proceeded without interruption until Monday last, the 8th instant, when 1250 miles (one-half of the whole cable) were completed. There are in this length 25,000 miles of strand, composed of seven times that quantity of wire, being a total of 175,000 miles of wire. The process of spinning occupied eighty days, 2500 miles of wire being used per day, and 350 hands being employed. The spun yarn was also made by Messrs. Newall upon their own machinery, 100 machines for this purpose being ranged in one of the upper floors of the works. The cable is now lying in four huge coils (each 28 feet in diameter and eight feet in height), all ready for being shipped. It will be transferred into small vessels, and thence on board the Niagara, which is daily expected at the mouth of the river. The weight of the cable averages about one ton per mile; and it is to be laid by the Norwegian Government, who have adopted in the Black Sea (passing the cable through a hollow cone), which prevents twisting. In the course of the after-dinner proceedings, Mr. Reid, the veteran electrician, stated that he had that morning made an experiment upon the cable with the most successful results. With a battery of infinitesimal proportions, namely, plates of zinc and copper a quarter of an inch square, he had succeeded in passing a perfect electric current along the whole length of 1250 miles of wire, so that the question of conductivity had been most satisfactorily solved. Messrs. Newall have contracted to lay down 1000 miles of the great Indian line of telegraph between Cagliari and Malta and Corfu.

THE SCHEMATIC TELEGRAPH PUT TO PROOF.—At Messrs. Glasse & Elliot's yard a fine submarine cable is being made for the Norwegian Government. This is, as far as we are aware, probably the first electric telegraph which has ever been used for fishing purposes. During the fishing season, the shoals of herrings enter the firths of Norway at most unexpected intervals, and at places where often not more than one or two fishing boats are to be found. Before the boats can be sent to the surrounding bays and firths can be summoned to the spot, the herrings have generally spawned and are away to sea again. To prevent these repeated disappointments and losses to the fishermen, the Norwegian Government is about to lay a submarine cable along some fifty miles of the coast most frequented by the shoals, with land stations at short distances, communicating with the fishing vessels. The instant the shoal is seen in the offing, therefore, and it can always be known at a distance by the whales which surround it, a message will be sent along the coast telling each village the hour or day which it has entered. A line for the poor herrings! What will become of them now that science enters the deep against them, and their enemy lurks in their watery home? They may clasp whales and fishing boats, and the fisherman may wave, but what can they do against the electric current? They will splash headlessly over the queer looking rope on the bottom without thinking that it is telling their numbers and the way they taken, and guiding their pursuers to the destruction of them all.—London Times 5th.

A "vigilance committee," on the system some time since adopted in San Francisco, California, has been established in the ancient town of Galway, to prevent the exportation of potatoes! On Saturday the 6th, a potato speculator, named Latton, attempted to export about 20 tons; but the "vigilance committee" interposed, and the potatoes were sent into the local market, where the prices slightly declined.

The British and Foreign Bible Society have resolved henceforth to open their meetings with prayer.

The Russian Minister of Foreign Affairs has transmitted to the Governor General of Bessarabia and New Russia an imperial order, authorizing him to fit the end of this month the limit of the stay of foreign traders at Sebastopol. The works for cleaning the port and getting up the sankets, vessels at Sebastopol are being energetically carried on.

It is rumored that General Sir W. Williams is on the eve of going abroad to assume a military command.

The Dublin Evening Post anticipates, that if Lord Palmerston refuse to alter the form of the oath in his Oath Bill, the opposition of the twelve Catholic peers will throw the bill out in the Lords.

A word to dyspeptics.—The Oxygennated Bitters is a sure remedy for Dyspepsia in all its various forms, and general debility, having the highest testimonials ever given in favor of any medicine in the world.

Charlottetown Markets, July 11. Beef, (quarter) lb. 54 1/2. Pork, (quarter) lb. 54 1/2. Mutton, (quarter) lb. 54 1/2. Veal, (quarter) lb. 54 1/2. Butter (fresh) lb. 104 1/2. Eggs, (per doz.) 24 1/2. PERRY DAVIS' VEGETABLE PAIN KILLER. STILL TRIUMPHANT! AND AFTER A THOROUGH TRIAL, THE MEDICINE OF THE AGE. These preparations have been many medicinal preparations brought before the public since the first introduction of Perry Davis' Vegetable Pain Killer, and large numbers expended in its trial, and the Pain Killer has continued steadily to advance in the estimation of the world as the best family medicine ever introduced. A safe and external remedy it is truly a source of JOY TO THE WORLD. One positive proof of its efficacy is, that the sales have constantly increased, and upon its own merits, as the proprietors have not resorted to advertising in its favor for the past ten years. The effect of the Pain Killer upon the patient, when taken internally, is in cases of Colds, Coughs, Bowel Complaints, Cholera, Dysentery, and other affections of the system, has been truly wonderful, and has won for it a name among medicinal preparations that never to be forgotten. It excels in relieving pains, as an external remedy, in cases of Burns, Bruises, Sore, Sprains, Cuts, Stings of insects, and other causes of suffering, has secured for it such a host of testimony, as an almost infallible remedy, that it will be handed down to posterity as one of the greatest medicinal discoveries of the nineteenth century. The magical effects of the Pain Killer when taken or used according to directions are certain. You have only to be sure that you buy the genuine article and adhere to the directions in its use, and you will admit its wonderful medicinal properties. The genuine Perry Davis' Pain Killer is now put up in panel bottles, with the words "Vegetable Pain Killer blown in the glass;" and with two steel engraved labels on each bottle, one of which is in case of Colds, Coughs, Bowel Complaints, Cholera, Dysentery, and other affections of the system, has been truly wonderful, and has won for it a name among medicinal preparations that never to be forgotten. It excels in relieving pains, as an external remedy, in cases of Burns, Bruises, Sore, Sprains, Cuts, Stings of insects, and other causes of suffering, has secured for it such a host of testimony, as an almost infallible remedy, that it will be handed down to posterity as one of the greatest medicinal discoveries of the nineteenth century.
