KINGSTON EXCITED.

REPORTED CONSPIRACY AT THE PENITENTIARY. All sorts of rumors about a conspiracy to attempt an outbreak...

Kingston, June 22.—This morning a rumor flew about the city to the effect that a conspiracy to attempt an outbreak...

Several residents of the village of Portmouth who were spoken to were all of the opinion that a gigantic conspiracy had been hatched in the city over the rumored attempt at an outbreak...

The batteries were still in the penitentiary this afternoon. There are all sorts of rumors about a conspiracy to attempt an outbreak...

TORONTO TOPICS. A Fair of Brother Burglars Fustled the Police, But are Captured.

Toronto, June 24.—Inspector Stark was happy yesterday, feeling sure that his men had succeeded in laying by the heels two of the gang of burglars who had been making such heavy hauls of silverware within the past two weeks.

The three men jumped the fence again and forced their way through private grounds into Jarvis street. Cuddy meanwhile was searching the grounds for them, trying to catch them before they started down Jarvis street on a run.

Acting Detective Watson and Patrol Sergeant Archibald were also on the alert that morning. They were on the lookout along Parliament street about 3.15, when they noticed a man sneaking out of a lane running from the west into the main street.

With KNIFE AND PISTOL. A Young Man Foully Butchered at Chatham.

CHATHAM, June 21.—A revolting atrocity occurred here on Wednesday evening. Frank Barr, a painter, aged 28, in company with Pont Taylor, and two girls, one of whom, Anne Kaiser, works as a servant for Mr. Thos. Stone, were sitting on the bench in front of the grounds of the Agricultural Society in Queen street.

Crime and the Clan-na-Gael. LONDON, June 24.—A Rome dispatch to the Standard says: Archbishop Feshan of Chicago having made a long report to the Vatican through Cardinal Simoni on the criminal acts of the Clan-na-Gael, the Pope has given instructions that the faculty be granted the Archbishop to take whatever measures he may deem appropriate to declare the Clan-na-Gael in opposition to the church.

A SENSATION AT THE CAPITAL.

The Niece of Cardinal Taschereau Quietly Wedded to a Protestant. OTTAWA, June 22.—A social sensation was created in official circles here this morning when it was known that Miss Amelie H. Taschereau, daughter of Mr. Justice Taschereau of the Supreme Court and niece of Cardinal Taschereau, had been quietly married Thursday to Mr. Frank Bevan, an employee of the Grand Atlantic Railway Company.

Mr. Bevan, who is about 20 years old, is the son of an English physician and several years ago came to Ottawa and secured a subordinate position as clerk in the employ of the Canadian Atlantic Railway Company. He became acquainted with the young lady about a year ago, and the young couple at once became fast friends despite the furious opposition of the young lady's parents, who looked upon Bevan as a parvenu.

LONDON, June 22.—There has been some loud talk about this week, as there was last week, but the situation is probably no more serious than usual. Servian troubles become acute for a moment, then subside into the usual state of chronic inflammation.

The Prince of Wales and the press between them have run to earth that London leper whose existence the Prince affirmed and some doubted. His name is Edward Foxall and he is a meat hawker at the Central Market.

Half, or more than half, of the London world has been at Asot all this week. The Society has camped on Asot Heath, and will to some extent stay there through next week on account of the Royal Agricultural Show at Windsor.

Next week, however, London gayeties recommence in spite of Windsor. It is London's last free week before the arrival of the Shah. London's every thinking is done for that potential which politics can suggest.

Information extracted from Walsh, while worth having, did not afford the rich leads for which the police hoped and he has been released.

BURKE IS MUM. His Counsel Preparing to Make a Big Fight Against Extradition. WINDSOR, June 23.—Notwithstanding sensational despatches appearing in American papers there is absolutely nothing new in the Burke case.

WASHINGTON, June 22.—Secretary Windom has determined to settle as soon as possible all the important tariff questions since his coming. He has long conference to-day with Assistant Secretary Tichenor.

Serious Accident at Gananoque. GANANOQUE, June 21.—An accident occurred at 6 p.m. yesterday through the giving way of some part of the running gear of the elevator at the Ontario Wheel Company works.

What in Illinois. SPRINGFIELD, Ill., June 22.—The State Board of Agriculture estimates that the wheat crop will not average more than 13 bushels per acre, making the total yield of the Illinois crop 28,269,370 bushels.

BURKE, COONEY, COUGHLIN BELIEVED TO BE THE MEN WHO BUTCHERED CRONIN.

O'Sullivan Anxious to Make a Full Confession—Has Burke "Squealed" to Chief McRae of Winnipeg? CHICAGO, June 22.—The Chief of Police Chicagoer now that Burke has been positively identified at Winnipeg by Martensen, and says: "For the first time I can see my way clearly. All I wanted was the capture of one of the principals. There will be a 'squealer' now because we are in a position to do without one. O'Sullivan wants to tell all he knows, and we will give him the opportunity very shortly. The evidence we have shows that Burke was one of the actual murderers, but I will not give the evidence away to the public yet."

In Burke the police have the man who rented the cottage. Burke is his "brother." Burke made Chicago Avenue and Market street his living place, and Martensen saw him several times after he hauled the furniture for him to the Carlton cottage. Burke's intimacy with Dan Coughlin is well known, and has been established. Woodruff's part in the job has also been fixed. The part played by O'Sullivan was a passive one. The police think Burke, Cooney and Coughlin were the men who murdered Cronin, though the third man may have been another than Coughlin. If not Coughlin he was another member of the famous Market street gang which had so much to do with the massacre of the night of May 29, and in which Coughlin was so influential.

As to who hired the braves who did the killing the police are rather in the dark. It will be easier to convict the murderers if the instigators can be traced. It is said that the police have recovered the lost clue to the movements of Patrick Cooney, supposed to be J. Sin onds, who bought the furniture for the Carlton cottage. It is given out that the police expect to capture Cooney positively within a few hours. Lieut. Elliott believes Burke was concerned in a murder previous to the murder of Cronin.

A special from Winnipeg reports Chief of Police McRae as saying: "There is no doubt in my mind that Burke was used as a tool by the gang who planned the Cronin murder, and that he really did not know he committed the deed. Burke was so thoroughly scared when arrested that I verily believe if I had chosen to pump him I could have got a complete confession."

There was a rumor about last night to the effect that the Chicago executive committee of the United Brotherhood were in town and that an executive meeting was to be held in which some line of action in regard to the Cronin mystery was to be settled upon. Luke Dillon would neither corroborate nor deny this rumor, though after considerable pressing he finally stated that there were only four members of the executive committee in the city at present.

More Trouble May be Expected. If you do not heed the warnings of nature, you will find attention to the maintenance of your health. How often we see a person put off from day to day the purchase of a medicine which if procured at the outset of a disease would have remedied it almost immediately.

I can plainly state that I can find nothing better than Hagyard's Yellow Oil. I have rheumatism occasionally, and Yellow Oil does me great good. You can use my name if you wish. Yours truly, H. Dickinson, Confectioner, St. Thomas, Ont.

Never Forget That the enemy of man is man. That the fairest flowers fade the soonest. That pride is never so offensive as when in chains.

That when men are lonely they stoop to any companionship. That the darkest cloud often contains the most fruitful showers.

That an open enemy is to be respected, a secret one to be suspected. That there may be loyalty without love, but never love without loyalty.

That death is a sleepless messenger and life a wakeful handmaid of creation. That a golden key will often find the way to unlock many a secret drawer.

HEALTH

Pain is a warning that something is wrong, and often an indication for absolute rest. It has been said that "pain is the prayer of a nerve for healthy blood." Sometimes it is a sure sign of what the trouble lies, sometimes it is misleading; nor is this symptom necessarily an indication of the severity of disease.

Sick Children—It is often a good sign for a child, who is seriously ill, to suddenly become cross. It is then he begins to feel his weakness, and to give vent to his feelings. "Children are almost always cross when recovering from an illness, however patient they may have been during its severest moments, and the phenomenon is not by any means confined to children."

Virtue in Onions and Beef.—What is the most strengthening food for a convalescent? Well, you know, the beef tea theory has been exploded. The most life-giving and digestible food that can be put into one's system after an illness is chopped beef. Just take a pound of the finest round of raw beef, cut off all the fat, slice two onions, and pepper and salt. Then chop the onions and meat together, turning them over and over until both are reduced almost to a pulp.

St. Vitus's Dance.—A physician of the Charite Hospital in Paris, has made an interesting communication to the Medical Society of the Paris hospitals on this subject. He presented a patient of middle age, who for upwards of four years had been a martyr to the dance of St. Vitus to such a degree that he was absolutely unable to carry a cup to his lips, to take soap without assistance, to button his clothes, to write his name, etc.

Stylish afternoon dresses, without being trained, are what is called demure, made just to touch the floor slightly in the back. A tea dress now in process of making has this half long skirt of lilac green China silk, ornamented above the hem with deep embroidery in ivory green silk with gold.

A Confectioner's Confidence. I can plainly state that I can find nothing better than Hagyard's Yellow Oil. I have rheumatism occasionally, and Yellow Oil does me great good. You can use my name if you wish. Yours truly, H. Dickinson, Confectioner, St. Thomas, Ont.

Never Forget That the enemy of man is man. That the fairest flowers fade the soonest. That pride is never so offensive as when in chains.

That when men are lonely they stoop to any companionship. That the darkest cloud often contains the most fruitful showers.

That an open enemy is to be respected, a secret one to be suspected. That there may be loyalty without love, but never love without loyalty.

That death is a sleepless messenger and life a wakeful handmaid of creation. That a golden key will often find the way to unlock many a secret drawer.

That it may be well to test the condition of a cat's claws before stroking its fur the wrong way.

THE FASHIONS.

A Variety of Jottings that Will Interest the Fair Sex. Serges for beach and tennis gowns are finer and softer than ever before, and are highly favored, both by English and American women.

Fashion gives itself great scope in toilets designed for calling, 5 o'clock teas, and other afternoon receptions, and a special place is here found for many of the elegant combinations of materials that flood the market, and which are innumerable in their variety.

Young English women are again wearing the "sun cap," a sort of bonnet, however, which has to be viewed from the back to be seen at all, as nothing is visible from a front view, when the capote is on the wearer's head, except a forest of very heavy fluffy, halo-like looking hair and some wide flat Alastian bows inclined downward, forming a kind of bandeau.

Milliners are displaying a great deal of the yellowish green which is known as "spring willow and chartreuse," and this is a favorite tone, but there is endless variety to select from. The palest water-green and the darkest moss and myrtle, with every intermediate shade known, are all represented, the color of foliage, grasses, vines and ferns being wonderfully imitated, tulle, gauze, velvet, silk and wool, repeating each artfully.

Lustrous mohairs and alpaca are excellent materials for long journeys, shopping, and general wear in the country. Many varieties of color are added to the standard shades, and there are also gay figures and stripes introduced on some of the patterns. Empire green, Suede, red, russet and copper red are all seen among the new mohairs, some of which are handsomely bordered.

Pretty morning jackets of American srah are shown, open in front over blouse shirt-waists of white China silk. The bishop's cravat is worn with this jacket when there are bishop sleeves of white silk beneath the slightly open ones of srah. This shirt is a straight band going round the neck, made of hemstitched silk muslin. In front hang two straight cravat ends likewise adorned. Plain cravats are made of bishop's lawn, simply hemmed, the ends finished with frills of Italian lace.

A majority of the new French round hats may be described as masses of beautiful flowers mounted on a basis that is as a rule, as grotesque in shape and of the airiest possible description. A spray of moss, a bit of maiden-hair fern, a long bramble from the hedge, twisted into a basket shape, and filled with artificial flowers that tempt one to sniff their fragrant aromas, so lifelike are they, such, without exaggeration, is a description that will serve for scores of hats displayed at the present moment.

Stylish afternoon dresses, without being trained, are what is called demure, made just to touch the floor slightly in the back. A tea dress now in process of making has this half long skirt of lilac green China silk, ornamented above the hem with deep embroidery in ivory green silk with gold.

Graceful and pretty home dresses are made of hunter's green or old rose cashmere, the backs in princess breast and the fronts cut at the waist line with an Empire or fullgathered vest of srah or China silk, finished with a soft sash of the same, edged with deep silk fringe and knotted at the left side.

That it may be well to test the condition of a cat's claws before stroking its fur the wrong way.

Severe Attacks. Miss Bella Elliot, of Pontypool, Ont., writes: "My brother and I were both taken ill with a severe attack of rheumatism, having tried other remedies, we tried Dr Fowler's Extract of Wild Strawberry, which gave immediate relief."
