It will be known as the Percheron-Norman Borse company. The cempany has secured a range, some fitteen by thirty miles in extent, on the South Platte, Colorado, about sixty miles from Denver, with an abundant supply of water. They have now on the range 1500 mares, all bred on the range, averaging about \$50 pounds in weight, and they are now shipping twenty imported PercNeron-Norman stallions, to be used upon these mares for breeding purposes. A very ingenious plan has been devised for coupling the mares and stallions during the breeding seasons, which will abviate the necessity of letting the stallions run at large with the mares, as has been the custom hitherto on ranges,

The above is a good likeness of Mrs. Lydia E. She is zealously devoted to her work, which is the outcome of a life-study, and is obliged to keep six lady assistants, to help her answerthe large correspondence which daily pours in upon her, each bearing its special burden of suffering, or joy at release from it. Her yegetable Compound is a medicine for good and not still purposes. I have personally investigated it and am satisfied of the truth of this.
On account of its provon merits, it is recommended and prescribed by the best physicians in the country. One says: "It works like a charm and saves much pain. It will cure entirely the worst forms of falling of the uterus, Leucorrhea, irregular and painful Menstruation, Eloodings, all Displacements and the consequent spinal weakness, and is especially adapted to the Change of Life."

Unfortunately the soft weather of Thursday and Friday seems to have caused several to abundon the trip, for as the tra useamed out of the station some of the best curders were missing, though one best curders were missing, though one or two were observed rushing vainly after the train. However the "freshies, who were alon," to onjoy the trip were pressed into service and the original plan was adhered to. The result was a terrib.
