

WANZER AGAIN AT THE FRONT

WITH HIS WONDERFUL MECHANICAL LAMP.

It is the admiration of all who see it. Now on exhibition at their elegantly furnished Sales Rooms, 84 KING-ST. WEST. Our sales are double our expectations. We are meeting with great success. We are happy to state that the people of Toronto and vicinity are looking for more light, and they have found it at WANZER'S.

We invite all to examine our Lamps.
No trouble to show them.
Call and we will prove to you we have the Finest Lamps on earth.

WATCH THIS SPACE NEXT SATURDAY FOR TESTIMONIALS.

THE MATCHLESS WANZER C SEWING MACHINE AT THE HEAD.

Valuable Improvements, New Attachments. Unequalled for Durability, Unexcelled in Light Running. In these times of severe competition the special, new and novel features found only in the Wanzer C sell at the best retail prices and in face of strongest opposition. The new selling points of the Wanzer are alone worth the price asked for any competing machine. It can now be seen in great variety at our Large and Handsome Sales Rooms.

- FIRE DEPARTMENT SUPPLIES of all kinds.

Eureka Cotton Fire Hose.

The strongest and most durable Fire Hose in the world. In active service in all the principal Fire Departments on this Continent. Manufacturers of the Celebrated Brands of SEAMLESS COTTON MILDEW-PROOF FIRE HOSE.

"EUREKA," a Triple or Three-Ply; "PARAGON," a Double or Two-Ply; "REDCROSS," a Single or One-Ply. The only Circular Seamless Woven Hose of distinct plies manufactured. The Most Perfectly Constructed Fire Hose of modern times. A Heavy Cotton Fabric, Seamless and Rubber Lined. Rapidly supplanting the present styles heretofore in use.

THE "EUREKA" FIRE HOSE

(weighing about 60 pounds per length of 50 feet), is a seamless fabric of cotton, triple web, or 3-ply, and rubber lined; the result of many years' labor, and involving a large expenditure of money. It is a perfect Fire Hose, combining lightness, great strength and durability, and is especially adapted to stand the rough usage to which it may be subjected. It is the product of an ingeniously constructed machine, consisting of no less than 8000 pieces, and has three distinct solid walls of cotton solidified together (in addition to the rubber lining), so that in case the outer wall receives injury the others remain intact. The producing of hose in this form has heretofore been considered an impossibility, and the ingenious mechanism by which it has been accomplished is justly regarded as one of the triumphs of modern invention.

THE "PARAGON" LEADING HOSE.

similar in appearance and construction to the "EUREKA" FIRE HOSE, with the exception of its being double instead of triple web (so similar in appearance and construction to the "EUREKA" FIRE HOSE, with the exception of its being double instead of triple web, and weighing about 80 pounds per length of 50 feet, which is especially adapted for Fire Hose, where Rubber-Lined Linen Hose has heretofore been used. It having the advantage over linen, being much more reliable in strength and durability, and we propose to place the "Red Cross" Hose in the market at prices which will meet the approval of all desiring a thoroughly reliable article at a reasonable cost.

THE "RED CROSS" HOSE.

We call the attention of Fire Department Officials to the "RED CROSS BRAND," a heavy, one-ply, seamless, rubber-lined, COTTON Hose, weighing about 80 pounds per length of 50 feet, which is especially adapted for Fire Hose, where Rubber-Lined Linen Hose has heretofore been used. It having the advantage over linen, being much more reliable in strength and durability, and we propose to place the "Red Cross" Hose in the market at prices which will meet the approval of all desiring a thoroughly reliable article at a reasonable cost.
